## Table of Contents

Chapter	Page
EXECUTIVE SUMMARY.....	iii
1. BACKGROUND.....	1
2. CONCEPTUAL FRAMEWORK.....	3
2.1 Appropriate Roles for the Public and Private Sectors.....	4
2.2 Appropriate Roles for User Charges and Subsidies.....	6
2.3 A Simple Resource Allocation Approach.....	6
3. INFORMATION NEEDS.....	9
Question 1: What resources are available for allocation to water supply, sanitation, and other health-related activities?....	9
Question 2: What are the costs of different levels of water supply and sanitation services?.....	10
Question 3: How can these costs be reduced?.....	12
Question 4: What is the willingness to pay for different levels of service in different natural and economic settings?.....	15
Question 5: What financing mechanisms can be used to recover (at least partially) the costs of investments in water supply and sanitation facilities?.....	21
Question 6: How can institutions, particularly existing local organizations, in the water supply and sanitation sector be strengthened?.....	24
Question 7: What is the health impact of different levels of water supply and sanitation service in different settings?.....	26
REFERENCES.....	41
TABLES	
1. Public- and Private-sector Roles in Health Programs.....	5
2. Assessing the Cost per Unit of the Health Impact of Water Supply and Sanitation Investments.....	7
3. Typical Capital Costs (in 1976 \$s) of Water and Sanitation Projects..	11
4. Total Investment Costs (in 1983 \$s) Per Capita of a Rural Water Supply.....	11
5. Average Annual Investment and Recurrent Cost per Household for Sanitation Technologies (after Kalbermatten et al., 1980).....	14
6. Anticipated Willingness to Pay (as Proportion of Household Income) for Water Services in Different Social and Natural Settings.....	17
