# Hydrology in Mountainous Regions I

HYDROLOGICAL  
MEASUREMENTS  
THE WATER CYCLE

*Revis*

*Lausanne*

Proceedings of two international symposia, the Symposium on Improved Methods of Hydrological Measurements in Mountain Areas (S1) and the Symposium on Quantitative and Qualitative Water Cycle Aspects in Heterogeneous Basins (S2), held at Lausanne, Switzerland, 27 August–1 September 1990. The symposia were part of the International Conference on Water Resources in Mountainous Regions jointly convened by the International Association of Hydrological Sciences (IAHS) and the International Association of Hydrogeologists (IAH).

# CONTENTS

Preface to papers for the Symposium on Improved Methods of Hydrological Measurements in Mountain Areas *Herbert Lang* v

Preface (*in French*) to papers for the Symposium on Quantitative and Qualitative Water Cycle Aspects in Heterogeneous Basins *A. Musy* vii

## *Symposium on Improved Methods of Hydrological Measurements in Mountain Areas*

### **TOPIC A: RELIABILITY OF PRECIPITATION MEASUREMENTS**

Evaluation of precipitation gauges for measuring precipitation on mountainous watersheds *C. L. Hanson* 3

Methods of estimating precipitation inputs to the Balquhidder experimental basins, Scotland *R. C. Johnson, J. R. Blackie & J. A. Hudson* 7

Simulation of weather radar ground clutter in a mountainous area using a digitized elevation model *T. Lebel* 15

Amount and variability of cloud moisture input in a tropical cloud forest *T. Stadmüller & N. Agudelo* 25

Rainfall variations in mountainous regions *G. du T. de Villiers* 33

### **TOPIC B: METHODS OF DIRECT ESTIMATION OF EVAPORATION**

Atmosphere and surface control on evaporation from alpine tundra in the Canadian Cordillera *W. G. Bailey, I. R. Saunders & J. D. Bowers* 45

Evaporation measurements in the Alpine basin Gletsch during the ALPEX/RHONEX project *A. Bernath* 53

On the spatial variability of hydrologic processes in a small mountainous basin *G. Peschke, K. Miegel, Ch. Etzenberg & H. Hebentanz* 61

Evaluation of evaporation models for alpine tundra, British Columbia, Canada *I. R. Sanders & W. G. Bailey* 71

A lysimeter for the measurement of evaporation from high altitude grass *I. R. Wright* 79

### **TOPIC C: ASSESSMENT OF SNOW AND GLACIERS AS WATER BALANCE AND RIVER FLOW COMPONENTS**

Bilan hydrologique du bassin versant de la Massa et bilan de masse des glaciers d'Aletsch (Alpes bernoises, Suisse) *M. Aellen & M. Funk* 89

Modelling discharge of glacierized basins assisted by direct measurements of glacier mass balance *L. N. Braun & M. Aellen* 99

Modalités de fonte de neige en moyenne montagne et alimentation du karst sous-jacent <i>P. Chauve, J. Mania &amp; D. Moindrot</i>	107
On the influence of Alpine glaciers on runoff <i>Jiyang Chen &amp; Atsumu Ohmura</i>	117
Estimation of Alpine glacier water resources and their change since the 1870s <i>Jiyang Chen &amp; Atsumu Ohmura</i>	127
Contribution de la neige et des glaciers dans le débit des rivières: suivi par télédétection spatiale <i>J. P. Dedieu</i>	137
Improving methods for measurement and estimation of snow storage in alpine watersheds <i>Kelly Elder &amp; Jeff Dozier</i>	147
Improved methods of assessment of snow and glaciers as water balance and river flow components <i>Angela M. Gurnell</i>	157
A lysimetric snow pillow station at Kühtai/Tyrol <i>R. Kimbauer &amp; G. Blöschl</i>	173
Methods for the computations of onset date and daily hydrograph of the outburst from the Mertzbacher Lake, Tien-shan <i>V. G. Konovalov</i>	181
Role of glacier and snow cover melting in runoff variations from the small basins in Pamir and the Alps <i>F. I. Pertziger</i>	189
Point modelling of snow cover water equivalent based on observed variables of the standard meteorological networks <i>M. B. Rohrer &amp; H. Lang</i>	197
 <b>TOPIC D: IMPROVED METHODS OF MEASURING DISCHARGE IN MOUNTAIN RIVERS, INCLUDING PROBLEMS OF BED LOAD</b>	
Acoustic sensors (hydrophones) as indicators for bed load transport in a mountain torrent <i>R. Bänziger &amp; H. Burch</i>	207
Determination of discharge rates in turbulent streams by salt tracer dilution applying a microcomputer system. Comparison with current meter measurements <i>R. Benischke &amp; T. Harum</i>	215
Experiences and results from using a big-frame bed load sampler for coarse material bed load <i>K. Bunte</i>	223
Mesures des débits solides et liquides sur des bassins versants expérimentaux de montagne <i>J. P. Cambon, N. Mathys, M. Meunier &amp; J. E. Olivier</i>	231
Seuil jaugeur adapté aux petits bassins versants à fort transport solide <i>O. Cayla, P. Jehanno &amp; M. Ouaar</i>	239
Refinements in dilution gauging for mountain streams <i>Kelly Elder, Richard Kattelmann &amp; Rob Ferguson</i>	247
Flow measurement under difficult measuring conditions: field experience with the salt dilution method <i>A. Gees</i>	255
Reliability of bed load measurements in mountain rivers <i>B. V. Georgiev</i>	263
Utilisation de mesures journalières de la turbidité pour l'estimation des flux de matières en suspension. L'exemple des fleuves andins de Bolivie <i>J. L. Guyot &amp; H. Calle</i>	271

Choice and calibration of streamflow structures for two mountain experimental basins <i>J. A. Hudson, R. C. Johnson &amp; J. R. Blackie</i>	275
Measurement of coarse sediment transport in a small Alpine stream <i>M. A. Lenzi, L. Marchi &amp; G. R. Scussel</i>	283
Overflow weirs as gauging stations in mountain brooks <i>H. Moschen</i>	291
Hydrological and sediment monitoring in mountainous pilot watersheds in Sefid Rud basin in Iran <i>R. Pavlovic, S. Prohaska, M. Behbehani, B. Babakhanloh &amp; S. Damavandi</i>	299
Spatial and temporal variation of flow resistance in an Alpine river <i>P. E. Stüve</i>	307
Comparison of bed load yield estimates for a glacial meltwater stream <i>J. Warburton</i>	315

### *Symposium on Quantitative and Qualitative Water Cycle Aspects in Heterogeneous Basins*

#### **TOPIC A: QUANTITATIVE SPACE-TIME WATER VARIABILITY**

Méthodes d'étude de la variabilité spatiale du cycle hydrique dans le petit bassin du Ringelbach <i>B. Ambroise</i>	327
The importance of hydrological networks for estimating average flows in Alpine regions <i>H. Aschwanden</i>	335
Investigations of the precipitation conditions in the central part of the Tianshan mountains <i>Felix P. Blumer</i>	343
Evolution spatio-temporelle des débits et des matières particulières sur un bassin des Andes boliviennes: le Rio Béni <i>J. Bourges, J. L. Guyot, M. Carrasco, M. C. Barragan &amp; J. Cortes</i>	351
Synthèse régionale pluviométrique en région montagneuse <i>O. Cayla &amp; M. Taibi</i>	357
Variability of runoff from partially-glacierised Alpine basins <i>David N. Collins &amp; David P. Taylor</i>	365
Intérêt de la densité de drainage pour régionaliser les données hydrologiques en zone montagneuse <i>J. Humbert</i>	373
Hétérogénéité des précipitations sur la Cordillère des Andes boliviennes <i>M. A. Roche, A. Aliaga, J. Campos, J. Pena, J. Cortes &amp; N. Rocha</i>	381
New findings from the investigation of the runoff regime in the Police Cretaceous basin in the Bohemian Massif <i>K. Sarga &amp; F. Slepíčka</i>	389
Factors controlling the spatial variability of direct annual runoff as a percentage of total runoff <i>L. Solin</i>	399
Estimation of monthly precipitation by geographical factors and meteorological variables <i>Keiichi Yamada</i>	405
Tracking rainfall impulses through progressively larger drainage basins in steep forested terrain <i>Robert R. Ziemer &amp; Raymond M. Rice</i>	413

**TOPIC B: QUALITATIVE SPACE-TIME WATER VARIABILITY**

- Polycyclic aromatic hydrocarbons as pollutants of the aquatic environment in the Sudety Mts, southwestern Poland *T. Bąbelek & J. Grochmalicka-Mikołajczyk* 423
- Hydrograph and chemograph separation of bulk meltwaters draining the upper Arolla Glacier, Valais, Switzerland *G. H. Brown & M. Tranter* 429
- Seasonal and annual variations of suspended sediment transport in meltwaters draining from an Alpine glacier *David N. Collins* 439
- Image synchrone de la composition isotopique de la couverture neigeuse des Alpes de Suisse occidentale *M. Dray, A. Parriaux & J. D. Dubois* 447
- Qualitative determination of drainage basin storage in nine drainage basins of the Basque Country, northern Spain *J. Garcia Muñiz, I. Antiguada Auzmendi & J. Llamas Siendones* 455
- The significance of suspended sediment pulses for estimating suspended sediment load and identifying suspended sediment sources in Alpine glacier basins *A. M. Gurnell & J. Warburton* 463
- Environmental contamination and other anthropogenic impacts on Otamiri and Nwaore rivers, Owerri, Nigeria *K. M. Ibe Sr., A. H. O. Sowa & O. C. Osundu* 471
- Extreme conditions of streamwater chemistry in a partly forested mountainous region *Hans M. Keller* 477
- Principal characteristics of fold-mountain hydrogeology *A. V. Kudelsky* 487
- Chemical composition of precipitation in a prealpine area of eastern Switzerland *O. Langenegger* 493
- Chemical composition of snow cover on the western Swiss Alps *Aurèle Parriaux, Jean-Daniel Dubois & Martial Dray* 501
- Acidification studies at northern Black Forest cirque lakes *H. Thies* 511

**TOPIC C: HYDROLOGICAL MODELLING IN REGIONS OF RUGGED RELIEF**

- The effect of space-time rainfall variability on unit hydrograph parameters *Š. Blažková* 519
- Modélisation des petits bassins versants au moyen de lois probabilistes: exemple des crues *O. Cayla, M. Demmak & M. Touat* 527
- Application of the Preissmann scheme on flood propagation in river systems in difficult terrain *K. W. Chau* 535
- Snowmelt assessment in a complex system of reservoirs (Comunidad de Madrid) *Francisco Cubillo* 545
- Application of the Kennesey method for the determination of the runoff coefficient and evaluation of aquifer recharge in mountain regions *D. Farina & A. Gaspari* 553
- Annual precipitation and regional effects on daily precipitation model parameters *C. L. Hanson & D. A. Woolhiser* 557

A comparative assessment of two approaches to evaluate anthropogenic effects on flood events in mountainous regions <i>J-P. Jordan, V. Laglaine &amp; Ph. Hohl</i>	565
Use of satellite data for hydrologic modelling of a mountain watershed <i>G. W. Kite</i>	573
Estimation des débits moyens mensuels sur cours d'eau alpins non mesurés: application à la Dranse de Bagnes <i>G. Luyet</i>	581
Runoff modelling in complex three-dimensional terrain <i>I. D. Moore, R. B. Grayson &amp; J. P. Wilson</i>	591
Hydrological modelling in regions of rugged relief <i>Ch. Obled</i>	599
Application du modèle couplé à discrétisation spatiale au bassin de la Fecht, Vosges (France) <i>J. L. Perrin, B. Ambroise &amp; J. Humbert</i>	615
Simulation of daily runoff in a mountainous catchment using the Tank model <i>K. S. Ramasastri</i>	623
Snowmelt runoff forecasts in Colorado with remote sensing <i>A. Rango, V. van Katwijk &amp; J. Martinec</i>	627
Prise en compte de la variabilité spatiale des pluies efficaces par un modèle semi-global: extension de la méthode DPFT à des cas bi-entrées <i>J. Y. Rodriguez &amp; Ch. Obled</i>	635
Modélisation pluie-débit de bassins à relief accident: le rôle de la variabilité spatiale de la pluie <i>D. Sempere Torres &amp; Ch. Obled</i>	645
Rainfall-runoff modeling of a microcatchment in the western region of Saudi Arabia <i>Ali U. Sorman, M. J. Abdulrazzak &amp; A. S. Elhames</i>	655
The "Hydrograph GGI-90" model and its application for mountain basins <i>Yu. B. Vinogradov</i>	661
Application of the unit hydrograph model to Swiss catchments <i>R. Weingartner</i>	669
The formation and calculation of cold region runoff in the Qilian mountains <i>Z. H. Yang</i>	677
A conceptual distributed model for large-scale mountainous basins <i>Fumio Yoshino, Junichi Yoshitani &amp; Masayuki Sugiura</i>	685
Simulation of daily runoff in the Urumqi River basin with the improved Tank model <i>Zhang Guowei, Shang Sichen &amp; Wang Xinqi</i>	693
 <b>TOPIC D: INTERACTION BETWEEN ACID RAIN AND PEDOLOGICAL AND GEOLOGICAL BASIN CHARACTERISTICS</b>	
Formalization of proton balances in elementary basins based upon the alkalinity concept and graph properties <i>G. Bourrie &amp; F. Lelong</i>	703
The influence of forest decline and soil acidification on water yield from forest catchments of the northern Black Forest, FR Germany <i>H. J. Caspary</i>	713
A multivariate model of solute behaviour for an episodic acid stream in the Black Forest, FR Germany <i>H. Meesenburg</i>	723

Fate of atmospheric deposition in small forested catchments depending on local factors <i>H. Sager, J. Bittersohl, T. Haarhoff, I. Habberger, K. Moritz, A. Knorr &amp; H-H. Lechler</i>	733
Groundwater contributions to the hydrochemistry of an alpine basin <i>Mark Williams, Richard Kattelmann &amp; John Melack</i>	741
<b>TOPIC E: ASSESSMENT OF THE UTILIZATION POTENTIAL OF SURFACE WATER RESOURCES</b>	
Surface water potential and its utilisation in India <i>Subhra Chakravarty</i>	751
Evaluation des potentialités d'utilisation des eaux de surface en Suisse <i>A. Goetz</i>	759
La régularisation du Lac Léman <i>P. Grandjean</i>	769
Hydrology and development of the Arun River, Nepal <i>Richard Kattelmann</i>	777
Water and energy in Austria <i>S. Radler</i>	785
Methods for evaluating hydro potential <i>H. W. Weiss &amp; A. O. Faeh</i>	793
<b>TOPIC F: GENERAL PAPER</b>	
Quantitative and qualitative water cycle aspects in heterogeneous basins <i>H. J. Morel-Seytoux</i>	803
