Contents

Preface ..... **xiii**

1. **Environmental Engineering** **1**

Civil Engineering 1
Public Health 5
Ecology 6
Ethics 7
Environmental Engineering as a Profession 8

2. **Risk Analysis** **11**

Risk 11
Expression of Risk 12
Assessment of Risk 14
Exposure and Latency 14
Dose-Response Evaluation 15
Population Responses 17
Problems 18

3. **Water Pollution** **21**

Sources of Water Pollution 22
Elements of Aquatic Ecology 24
Biodegradation 27
Aerobic and Anaerobic Decomposition 28
Effect of Pollution on Streams 30
Effect of Pollution on Lakes 38
Heavy Metals and Toxic Substances 42
Effect of Pollution on Oceans 43
Conclusion 43
Problems 44

4. **Measurement of Water Quality** 49

Sampling 50
Dissolved Oxygen 50
Biochemical Oxygen Demand 53
Chemical Oxygen Demand 59
Total Organic Carbon 59
Turbidity 60
Color and Odor 60
pH 61
Solids 62
Nitrogen 64
Phosphates 66
Bacteriological Measurements 66
Viruses 69
Heavy Metals 69
Trace Toxic Organics 69
Conclusion 70
Problems 70

5. **Water Supply** 73

The Hydrologic Cycle and Water Availability 73
Groundwater Supplies 74
Surface Water Supplies 79
Water Transmission 83
Elements of Closed-Conduit Hydraulics 84
Closed-Conduit Flow 85
Pumps and Pumping 93
Pump Characteristic Curves 95
System Head Curves 96
Operating Head and Discharge 97
Conclusion 99
Problems 99

6. **Water Treatment** 103

Coagulation and Flocculation 105
Settling 109
Filtration 110
Disinfection 119
Conclusion 120
Problems 120

7. **Collection of Wastewater** 123

Estimating Wastewater Quantities 123
System Layout 125
Sewer Hydraulics 128
Conclusion 135
Problems 136

8. **Wastewater Treatment** 137

Wastewater Characteristics 138
Onsite Wastewater Disposal 139
Central Wastewater Treatment 143
Primary Treatment 144
Settling Tank Design and Operation 148
Secondary Treatment 155
Biological Process Dynamics Applied to the Activated Sludge System 162
Tertiary Treatment 171
Conclusion 175
Problems 177

9. **Sludge Treatment and Disposal** 183

Sources of Sludge 183
Characteristics of Sludges 185
Sludge Treatment 189
Sludge Stabilization 189
Sludge Thickening 193
Sludge Dewatering 198
Ultimate Disposal 209
Conclusion 211
Problems 212

10. **Nonpoint Source Water Pollution** 215

The Runoff Process 217
The Art and Science of Developing and Applying Loading Functions for Sediment Detachment and Transport 219
Control Technologies Applicable to Nonpoint Source Pollution 227
Agriculture 227
Silviculture 228
Construction 229
Mining 230
Urban Stormwater Runoff 232
Conclusion 234
Problems 234

11. **Water Pollution Law** 237

Common Law 238
Statutory Law 241
Pretreatment Guidelines 243
Drinking Water Standards 245
Conclusion 246
Problems 247

12. **Solid Waste** 249

Quantities and Characteristics of Municipal Solid Waste 250
Collection 253
Disposal Options 260
Litter 260
Conclusion 261
Problems 261

13. **Solid Waste Disposal** 265

Disposal of Unprocessed Refuse 265
Volume Reduction Before Disposal 274
Conclusion 277
Problems 277

14. **Resource Recovery** 279

Source Separation 279
Solid Waste Separation Processes 280
Size Reduction 280
Shredder Performance and Design 282
General Expressions for Materials Recovery 286
Screens 287
Air Classifiers 289
Magnets 291
Other Separation Equipment 293
Energy Recovery from the Organic Fraction of Municipal Solid Waste 293
Conclusion 299
Problems 300

15. **Hazardous Waste** 303

Magnitude of the Problem 303
Waste Processing and Handling 306
Transportation of Hazardous Wastes 307

Resource Recovery Alternatives 309
Information Clearinghouses 309
Materials Exchanges 310
Hazardous Waste Management Facilities 311
Siting Considerations 311
Incinerators 312
Landfills 317
Conclusion 319
Problems 319

16. **Radioactive Waste** 321

Radiation 321
Radioactive Decay 322
Alpha, Beta, and Gamma Radiation 325
Units for Measuring Radiation 328
Measuring Radiation 331
Health Effects 331
Sources of Radioactive Waste 334
The Nuclear Fuel Cycle 335
Reprocessing Waste 340
Other Reactor Waste 340
Other Sources of Radioactive Waste 341
Movement through the Environment 342
Radioactive Waste Management 344
High-Level Radioactive Waste 344
TRU Waste 346
Low-Level Radioactive Waste 346
Conclusions 347
Problems 348

17. **Solid and Hazardous Waste Law** 351

Nonhazardous Solid Waste 352
Hazardous Waste 355
Conclusion 360
Problems 360

18. **Air Pollution** 363

Types of Air Pollutants 366
Gaseous Pollutants 366
Particulate Pollutants 369
The Greenhouse Effect 371

Sources of Air Pollution 372
Sulfur Dioxide 372
Oxides of Nitrogen 373
Carbon Monoxide 374
Hydrocarbons 374
Primary and Secondary Sources 374
Ozone (Photochemical Oxidant) 374
Acid Rain 376
Suspended Particulate Matter 377
Lead 378
Hazardous Substances 378
Health Effects 379
The Respiratory System 381
Carbon Monoxide 381
Particulate Matter 383
Effects on Vegetation 386
Effects on Domestic Animals 387
Effects on Materials 388
Effects on Atmosphere 388
Conclusion 389
Problems 389

19. Meteorology and Air Quality 391

Basic Meteorology 391
Horizontal Dispersion of Pollutants 394
Vertical Dispersion of Pollutants 396
Effect of Water in the Atmosphere 401
Atmospheric Dispersion 402
Cleansing the Atmosphere 407
Gravity 408
Surface Sink 409
Precipitation 410
Conclusion 410
Problems 410

20. Measurement of Air Quality 415

Measurement of Particulates 416
Measurement of Gases 419
Reference Methods 422
Grab Samples 422
Stack Sampling 423
Smoke and Opacity 423
Conclusion 424
Problems 424

21. **Air Pollution Control** 425

Source Correction 425
Collection of Pollutants 426
Cooling 427
Treatment 427
Settling Chambers 429
Cyclones 429
Bag (or Fabric) Filters 433
Wet Collectors 434
Electrostatic Precipitators 436
Comparison of Particulate Control Devices 438
Control of Gaseous Pollutants 438
Control of Sulfur Oxides 440
Control of Nitrogen Oxides 443
Control of Volatile Organics and Odors 444
Control of Moving Sources 445
Conclusion 448
Problems 448

22. **Air Pollution Law** 451

Air Quality and Common Law 451
Tort Law 451
Property Law 453
Statutory Law 454
National Ambient Air Quality Standards (NAAQS) 454
Regulation of Emissions 456
Prevention of Significant Deterioration 457
Hazardous Air Pollutants 458
Mobile Sources 458
Nonattainment 459
Problems of Implementation 459
Conclusion 461
Problems 461

23. **Noise Pollution** 463

The Concept of Sound 464
Sound Pressure Level, Frequency, and Propagation 466
The Acoustic Environment 470
Health Effects of Noise 472
The Dollar Cost of Noise 475
Degradation of Environmental Quality 476
Conclusion 476
Problems 476

24. Noise Measurement and Control 479

Sound Level 479
Measuring Transient Noise 483
Noise Control 485
Industrial Noise Control 485
Community Noise Control 485
Noise in the Home 487
Conclusion 488
Problems 488

25. Environmental Impact and Economic Assessment 491

Environmental Impact 492
Environmental Inventories 493
Environmental Assessment 494
Evaluation 499
Socioeconomic Impact Assessment 499
Financing of Capital Expenditures 500
Increases in User Charges 502
Sociological Impacts 504
Conclusions 504
Problems 504

26. The Environmental Ethic 507

Causes of the Problem of Our Incompatibility with Nature 509
Religion as the Cause 509
Social Structure as the Cause 511
Science and Technology as the Cause 512
Resolution of Environmental Conflicts 513
The Future of the Environmental Ethic 516
Problems 517

Appendix: Conversion Factors 525

Index 529
