

This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of the United Nations Environment Programme, the International Labour Organisation, or the World Health Organization.

Environmental Health Criteria 194

ALUMINIUM

First draft prepared by Dr H. Habs, Dr B. Simon and Professor K.U. Thiedemann (Fraunhofer Institute, Hanover, Germany) and Mr P. Howe (Institute of Terrestrial Ecology, Monks Wood, United Kingdom)

Published under the joint sponsorship of the United Nations Environment Programme, the International Labour Organisation, and the World Health Organization, and produced within the framework of the Inter-Organization Programme for the Sound Management of Chemicals.

World Health Organization
Geneva, 1997

CONTENTS

ENVIRONMENTAL HEALTH CRITERIA FOR ALUMINIUM

1.	SUMMARY AND CONCLUSIONS	1
1.1	Identity, physical and chemical properties	1
1.2	Analytical methods	1
1.3	Sources of human and environmental exposure	1
1.4	Environmental transport, distribution and transformation	2
1.5	Environmental levels and human exposure	3
1.6	Kinetics and metabolism	4
1.6.1	Humans	4
1.6.2	Animals	5
1.7	Effects on laboratory mammals and <i>in vitro</i> test systems	5
1.8	Effects on humans	7
1.9	Effects on other organisms in the laboratory and field	10
1.10	Conclusions	11
1.10.1	General population	11
1.10.2	Subpopulations at special risk	12
1.10.3	Occupationally exposed populations	12
1.10.4	Environmental effects	13
2.	IDENTITY, PHYSICAL AND CHEMICAL PROPERTIES, ANALYTICAL METHODS	14
2.1	Identity	14
2.2	Physical and chemical properties	14
2.2.1	Aluminium metal	14
2.2.2	Aluminium compounds	19
2.3	Analytical methods	23
2.3.1	Sampling and sample preparation	23
2.3.2	Separation and concentration	28
2.3.3	Detection and measurement	30
2.3.4	Speciation analysis of aluminium in water	32
3.	SOURCES OF HUMAN AND ENVIRONMENTAL EXPOSURE	34
3.1	Natural occurrence	34

3.2	Anthropogenic sources	34
3.2.1	Production levels and processes	35
3.2.2	Uses	35
4.	ENVIRONMENTAL TRANSPORT, DISTRIBUTION AND TRANSFORMATION	38
4.1	Transport and distribution between media	38
4.1.1	Air	38
4.1.2	Freshwater	39
4.1.2.1	Dissolved aluminium	39
4.1.2.2	Aluminium adsorbed on particles	42
4.1.2.3	Aluminium in acidified waters ..	43
4.1.3	Seawater	47
4.1.4	Soil	48
4.1.5	Vegetation and wildlife	52
4.2	Biotransformation	53
4.2.1	Biodegradation and abiotic degradation ...	53
4.2.2	Bioaccumulation	53
4.2.2.1	Plants	53
4.2.2.2	Invertebrates	53
4.2.2.3	Fish	55
4.2.2.4	Birds	56
5.	ENVIRONMENTAL LEVELS AND HUMAN EXPOSURE	57
5.1	Environmental levels	57
5.1.1	Air	57
5.1.2	Precipitation	59
5.1.3	Water	60
5.1.3.1	Freshwater	60
5.1.3.2	Seawater	66
5.1.4	Soil and sediment	66
5.1.5	Terrestrial and aquatic organisms	69
5.2	Occupational exposure	73
5.3	General population exposures	74
5.3.1	Air	74
5.3.2	Food and beverages	74
5.3.3	Drinking-water	75
5.3.4	Miscellaneous exposures	77

5.3.5	Total human intake of aluminium from all environmental pathways	78
5.3.6	Aluminium uptake	78
6.	KINETICS AND METABOLISM IN LABORATORY ANIMALS	80
6.1	Absorption	80
6.1.1	Animal studies	80
6.1.1.1	Inhalation exposure	80
6.1.1.2	Oral administration	80
6.1.1.3	Dermal	90
6.1.2	Studies in humans	90
6.1.2.1	Inhalation exposures	90
6.1.2.2	Oral administration	91
6.1.2.3	Dermal exposure	100
6.2	Distribution	100
6.2.1	Animal studies	100
6.2.2	Human studies	102
6.2.2.1	Transport in blood	102
6.2.2.2	Plasma aluminium concentrations in humans	102
6.2.2.3	Tissue aluminium concentrations in humans	103
6.3	Elimination and excretion	105
6.3.1	Animal studies	105
6.3.2	Human studies	106
6.3.2.1	Urinary excretion	106
6.3.2.2	Biliary excretion	108
6.4	Biological indices of exposure, body burden and organ concentration	108
7.	EFFECTS ON LABORATORY MAMMALS AND <i>IN VITRO</i> TEST SYSTEMS	110
7.1	Single exposure	110
7.2	Short- and long-term exposure	111
7.2.1	Oral administration	111
7.2.2	Inhalation exposure	117
7.2.3	Parenteral administration	117
7.3	Reproductive and developmental toxicity	118
7.3.1	Reproductive effects	118

7.3.2	Developmental effects	118
7.4	Mutagenicity and related end-points	124
7.4.1	Interactions with DNA	124
7.4.2	Mutations	124
7.4.3	Chromosomal effects	125
7.5	Carcinogenicity	125
7.6	Neurotoxicity	125
7.6.1	Impairments of cognitive and motor function	126
7.6.2	Alterations in electrophysiological properties	127
7.6.3	Metabolic effects in the nervous system ..	128
7.7	Effects on bone	129
7.7.1	Toxic effects of aluminium in the skeleton	130
7.7.2	Dose response	135
7.8	Effects on mineral metabolism	135
8.	EFFECTS ON HUMANS	138
8.1	General population exposure	138
8.1.1	Acute toxicity	138
8.1.2	Effects of short-term exposure	138
8.1.3	Neurotoxic effects	139
8.1.3.1	Aluminium and Alzheimer's disease (AD)	139
8.1.3.2	Epidemiological studies on AD and environmental aluminium levels	141
8.1.3.3	Epidemiological studies relating aluminium concentrations in water to cognitive dysfunction .	146
8.1.3.4	Other neurological conditions in the general population	147
8.1.3.5	Conclusions regarding neuro- logical effects of aluminium ...	147
8.1.4	Allergic effects	148
8.2	Occupational exposure	148
8.2.1	Respiratory tract effects	149
8.2.1.1	Restrictive pulmonary disease .	149
8.2.1.2	Obstructive pulmonary disease .	152
8.2.2	Central nervous system effects	153

8.3	Cancer	155
8.4	Genotoxicity	155
8.5	Reproductive toxicity	155
8.6	Subpopulations at special risk	155
8.6.1	Encephalopathy	156
8.6.2	Osteomalacia	157
8.6.3	Microcytic anaemia	157
9.	EFFECTS ON OTHER ORGANISMS IN THE LABORATORY AND FIELD	158
9.1	Laboratory experiments	158
9.1.1	Microorganisms	158
9.1.1.1	Water	158
9.1.1.2	Soil	159
9.1.2	Aquatic organisms	159
9.1.2.1	Plants	159
9.1.2.2	Invertebrates	162
9.1.2.3	Fish	168
9.1.2.4	Amphibians	182
9.1.3	Terrestrial organisms	184
9.1.3.1	Plants	184
9.1.3.2	Invertebrates	185
9.1.3.3	Birds	185
9.2	Field observations	186
9.2.1	Microorganisms	186
9.2.2	Aquatic organisms	186
9.2.2.1	Plants	186
9.2.2.2	Invertebrates	186
9.2.2.3	Vertebrates	188
9.2.3	Terrestrial organisms	193
9.2.3.1	Plants	193
9.2.3.2	Invertebrates	195
9.2.3.3	Vertebrates	195

10. EVALUATION OF HUMAN HEALTH RISKS AND EFFECTS ON THE ENVIRONMENT	196
10.1 Health effects	196
10.1.1 Exposure assessment	197
10.1.2 Evaluation of animal data	197
10.1.3 Evaluation of human data	198
10.2 Evaluation of effects on the environment	200
10.2.1 Exposure	200
10.2.2 Effects	201
11. CONCLUSIONS AND RECOMMENDATIONS FOR PROTECTION OF HUMAN HEALTH AND THE ENVIRONMENT	202
11.1 Conclusions	202
11.1.1 Healthy general population	202
11.1.2 Subpopulations at special risk	203
11.1.3 Occupationally exposed populations	203
11.1.4 Environmental risk	203
11.2 Recommendations	204
11.2.1 Public health protection	204
11.2.2 Recommendations for protection of the environment	204
12. FURTHER RESEARCH	205
12.1 Bioavailability and kinetics	205
12.2 Toxicological data	205
12.3 Research on the relationship between aluminium exposure and Alzheimer's disease	206
12.4 Occupational exposure	207
13. PREVIOUS EVALUATIONS BY INTERNATIONAL BODIES	208
REFERENCE	209
RESUME ET CONCLUSIONS	253
RESUMEN Y CONCLUSIONES	268
