Proceedings of the Third International Conference on FRIEND held at Postojna, Slovenia, from 30 September to 4 October 1997. The conference was convened jointly by the steering committee of the Alpine Mediterranean Hydrology (AMHY) FRIEND project with the support of other FRIEND groups: Northern European FRIEND, Southern African FRIEND, West and Central African FRIEND and the National Committee of Slovenia for the International Hydrological Programme of the United Nations Educational, Scientific and Cultural Organization (UNESCO) and the Operational Hydrological Programme of World Meteorological Organization (WMO). The conference was sponsored by UNESCO, WMO, the European Commission, the International Association of Hydrological Sciences (IAHS) and the Ministry of Science and Technology, Republic of Slovenia.

# Contents

Preface by <i>Alan Gustard</i>	v
<b>1 International Hydrological Databases</b>	
WHYCOS, a programme supporting regional and global hydrology <i>Serge A. Pieyns &amp; Dieter Kraemer</i>	3
Information transfer in hydrology: experiences of the Global Runoff Data Centre <i>Wolfgang E. Grabs</i>	11
<b>2 The Spatial and Temporal Variability of Hydrological Regimes: Mean Runoff</b>	
The derivation of a runoff grid for southern Africa for climate change impact analyses <i>Nicholas Reynard, Anthony Andrews &amp; Nigel Arnell</i>	23
Estimation of renewable water resources in the European Union <i>H. G. Rees, K. M. Croker, N. S. Reynard &amp; A. Gustard</i>	31
Derivation of flow discharges from runoff maps and digital terrain models in Spain <i>Teodoro Estrela, Luis Quintas &amp; Javier Alvarez</i>	39
<b>3 The Spatial and Temporal Variability of Hydrological Regimes: Regime Variability</b>	
Quantification of catchment discharge sensitivity to climate variability <i>B. Van der Wateren-de Hoog &amp; M. R. Hendriks</i>	51
The variability of hydrological series due to extreme climate conditions and the possible change of the hydrological characteristics with respect to potential climate change <i>Olga Majerčáková, Miriam Fendeková &amp; Danica Lešková</i>	59
Hydrological regimes in the FRIEND-AMHY area: space variability and stability <i>Viorel Alexandru Stanescu &amp; Valentina Ungureanu</i>	67
Spatial and temporal variability in European river flows and the North Atlantic oscillation <i>C. A. Shorthouse &amp; N. W. Arnell</i>	77
Historical runoff variation in the Nordic countries <i>Lars A. Roald, Hege Hisdal, Tapani Hiltunen, Veli Hyvärinen, Torbjørn Jutman, Kristinn Gudmundsson, Páll Jonsson &amp; Niels Bering Ovesen</i>	87
Temporal variability in the hydrologic regimes of the United States <i>E. F. Hubbard, J. M. Landwehr &amp; A. R. Barker</i>	97
<b>4 Hydrological Extremes: Low Flows</b>	
Using regional hydrology for assessing European water resources <i>A. Gustard, H. G. Rees, K. M. Croker &amp; J. M. Dixon</i>	107
Water information management system and low flow analysis in Slovenia <i>Mitja Brilly, Mira Kobold &amp; Andrej Vidmar</i>	117

Regional low-flow studies in South Africa <i>Vladimir Y. Smakhtin</i>	125
Frequency analysis of low flows by the PPCC test in Turkey <i>Atil Bulu &amp; Bihrat Onoz</i>	133
Regional analysis of extreme streamflow drought duration and deficit volume <i>Lena M. Tallaksen &amp; Hege Hisdal</i>	141
Temporal and spatial behaviour of drought in south Germany <i>Siegfried Demuth &amp; Barbara Heinrich</i>	151
Probabilistic analysis of extreme low flows in selected catchments in Poland <i>Włodzimierz Czamara, Wojciech Jakubowski &amp; Laura Radczuk</i>	159
<b>5 Hydrological Extremes: Catchment Modelling</b>	
Impact of land-use, climate change and groundwater abstraction on streamflow droughts using physically-based models <i>E. P. Querner, L. M. Tallaksen, L. Kašpárek &amp; H. A. J. van Lanen</i>	171
Groundwater management in the Jegrznia River valley <i>Waldemar Mioduszewski, Zbigniew Kowalewski, Alicja Ślesicka &amp; Erik P. Querner</i>	181
Hydrological drought analysis in the Hupsel basin using different physically-based models <i>H. A. J. van Lanen, L. M. Tallaksen, L. Kašpárek &amp; E. P. Querner</i>	189
Application of a physically-based model to identify factors causing hydrological drought in western and central European basins <i>Ladislav Kašpárek &amp; Oldřich Novický</i>	197
Analysis of the sensitivity of water balance components to hydrogeological conditions and climatic change <i>H. R. Nassery &amp; J. Buchtele</i>	205
<b>6 Hydrological Extremes: Rainfall Frequency</b>	
Towards a regionalization of extreme rainfall events in the Mediterranean area <i>Maria-Carmen Llasat &amp; Roberto Rodriguez</i>	215
Regional dependence and application of DAD relationships <i>Dietmar Grebner &amp; Thomas Roesch</i>	223
Regional analysis of convective storms achieved from dense hydrometeorological network data in an arid zone of the Southern Hemisphere <i>Pedro C. Fernández, Sara Rodriguez &amp; Luis Fornero</i>	231
Modification des régimes d'écoulement en Afrique de l'ouest et centrale non sahélienne et conséquences sur les ressources en eau <i>Eric Servat, Jean-Emmanuel Paturel, Brou Kouamé, Michel Travaglio, Hélène Lubès, Bertrand Marieu, Jean-Marie Fritsch &amp; Jean-Marie Masson</i>	241
Etude de séries pluviométriques de longue durée en Afrique de l'ouest et centrale non sahélienne <i>J. E. Paturel, E. Servat, M. O. Delattre, H. Lubès &amp; J. M. Fritsch</i>	249
Variations spatio-temporelles des régimes pluviométriques et hydrologiques en Afrique Centrale du début du siècle à nos jours <i>A. Laraque, J.-C. Olivry, D. Orange &amp; B. Marieu</i>	257
<b>7 Hydrological Extremes: Flood Frequency</b>	
Non-stationary regimes: the QdF models behaviour <i>Christel Prudhomme &amp; Gilles Galéa</i>	267

Représentativité des modèles QdF—application à la régionalisation des régimes de crue du bassin versant de la Loire (France) <i>Gilles Galéa &amp; Jerome Sourisseau</i>	277
Combining statistical and conceptual approaches for index flood estimation <i>Armando Brath, Carlo de Michele &amp; Renzo Rosso</i>	287
Prediction of design storms and floods <i>Urszula Soczyńska, Barbara Nowicka, Urszula Somorowska, Elzbieta Kupczyk &amp; Roman Suligowski</i>	297
Simulation de reseaux hydrographiques. Comportements geometriques et hydrologiques <i>Isabelle Desurosne &amp; Christophe Durore</i>	305
<b>8 Hydrological Processes</b>	
<i>In situ</i> measurements of hillslope runoff components with different types of forest vegetation <i>Hubert Holzmann &amp; Norbert Sereinig</i>	317
Erosion processes and their implications in sustainable management of watersheds in Nepal Himalayas <i>Suresh Raj Chalise &amp; Narendra Raj Khanal</i>	325
Erosion et transport particulaire par le Niger: du bassin supérieur à l'exutoire du delta intérieur (bilan de cinq années d'observation) <i>J. P. Bricquet, G. Mahé, F. Bamba, M. Diarra, A. Mahieu, T. des Tureaux, D. Orange, C. Picouet &amp; J. C. Olivry</i>	335
Regression analyses of heavy metal concentrations in urban flash floods of an arid zone <i>M. Nouh</i>	347
Gestion des ressources en eau et développement durable. Un exemple dans la Province de l'extrême-nord du Cameroun <i>Daniel Sighomnou &amp; Emmanuel Naah</i>	355
