

# HYDRO-ECOLOGY:

## *Linking Hydrology and Aquatic Ecology*

Edited by

M. C. ACREMAN

*Centre for Ecology and Hydrology (formerly Institute of Hydrology),  
Wallingford, Oxfordshire OX10 8BB, UK*

Proceedings of an international workshop (HW2) held during IUGG 99, the XXII General Assembly of the International Union of Geodesy and Geophysics (IUGG) held at Birmingham, UK, in July 1999. This workshop was convened by the IAHS International Commission on Surface Water, the International Commission on Water Quality, the International Commission on Continental Erosion and the International Commission on Atmosphere–Soil–Vegetation Relations

## Contents

Preface by <i>Mike Acreman</i>	v
Applied hydro-ecological science for the twenty-first century (overview paper) <i>M. J. Dunbar &amp; M. C. Acreman</i>	1
Modification of Niger Delta physical ecology: the role of dams and reservoirs <i>T. K. S. Abam</i>	19
The use of benthic invertebrate production for the definition of Ecologically Acceptable Flows in mountain rivers <i>Andrea Buffagni</i>	31
A technique to predict the hydro-ecological effects in an ecological assessment of water projects <i>Elke Freistühler, Antje Giers, Gert A. Schultz &amp; Hermann Josef Bauer</i>	43
The flood-plain model INFORM for predicting ecological impacts caused by alterations in mean river stage <i>Elmar Fuchs</i>	51
Sources, distribution and fate of arsenic along the Tolimán River, Zimapán, Mexico <i>Alfonso García, María Aurora Armienta &amp; Olivia Cruz</i>	57
Vertical integration of spatial and hydraulic data for improved habitat modelling using geographic information systems <i>Thomas B. Hardy &amp; R. Craig Addley</i>	65
Modelling abiotic–biotic links in the rivers of the Kruger National Park, Mpumalanga, South Africa <i>G. P. W. Jewitt, D. C. Weeks, G. L. Heritage &amp; A. H. M. Görgens</i>	77
The effects of large woody debris accumulations on river hydraulics and implications for physical habitat <i>Conor Linstead</i>	91
Streamflow regime change and ecological response in the Lake Chad basin in Nigeria <i>Lekan Oyebande</i>	101
In-channel metamorphosis in a semiarid, mixed bedrock/alluvial river system: implications for Instream Flow Requirements <i>M. W. Rountree, G. L. Heritage &amp; K. H. Rogers</i>	113
Upstream influence on the wetlands of the Bahr el Jebel, Sudan <i>J. V. Sutcliffe &amp; Y. P. Parks</i>	125
Eco-environment quality assessment: a quantifying method and case study in the Ning Xia arid and semiarid region, China <i>Xia Jun, Wang Zhonggen &amp; Wang Fuyong</i>	139
Hydro-ecological variability within a groundwater dominated stream <i>Paul J. Wood, Maureen D. Agnew &amp; Geoffrey E. Petts</i>	151
Key word index	161
