Weingartner, R., Spreafico, M., Scherrer, S., (Switzerland), Schumann, A. (Germany):

International Conference on Flood Estimation XI

Internationale Konferenz zum Thema Hochwasserabschätzung XV

Conférence Internationale sur la Prévision des Crues XIX

Proceedings

Oral Presentations

Topic 1: Flood Measurement Techniques 1

Keynote speaker: Sigrist, B. (Switzerland): An overview of flood measurement techniques 3

Baud, D. O., Hager, W. H., Minor, H. E. (Switzerland): Non-intrusive discharge measurements during floods 9

Meier, Ch. (Switzerland): Improving the flood handling qualities of power stations and other hydraulics structures 19

Sulzer, S., Kinzelbach, W., Rutschmann, P. (Switzerland): Inverse modelling to estimate flood discharge in rivers 27

Topic 2: Process Analysis as a Basis of Flood Modelling 37

Badoux, A., Hegg, Ch., Kienholz, H., Weingartner, R. (Switzerland): Investigation on the influence of storm caused damage on the runoff formation and erosion in small torrent catchments 39

Bardou, E., Marquis, F.-X., Niggli, M., Musy, A. (Switzerland): The role of snow in the generation of flood and solid transport in small alpine watershed 49

Beyer Portner, N., Pirotton, M., Archambeau, P., Dubois, J. (Switzerland): WOLFHYDRO - A spatially distributed hydrological model 57

Bott, W., Hofmann, T., Schenk, D. (Germany): Physically based modelling of runoff generation 65

Claps, P., Laio, F., Villani, P. (Italy): Assessment of extreme flood production mechanisms through POT analysis of daily data 75

Dangol, P. M., Merz, J., Weingartner, R. (Nepal): Flood generation in the middle mountains of Nepal 85

Dutta, D., Herath, S. (Japan): Modelling of flood inundation and effect of DEM on model outputs 93

Goulpié, P., Hertig, J. A., Reinhardt, F., Hug, Chr., Fallot, J. M., Stirnimann, O. F., Dubois, J. (Switzerland): Numerical modelling of probable maximum flood for the watershed of the Krasnodar Dam in Russia 101

Herath, S., Jha, R., Dutta, D. (Japan): Flood forecasting experiences in Asian River Basins 113

Joerin, Ch., Musy, A., Talamba, D. (Switzerland): Study of hydrological processes for better models and flood estimations 123

Kleinn, J., Frei, Ch., Gurtz, J., Vidale, P. L., Schär, Ch. (Switzerland): Climate change and runoff statistics: A process study for the Rhine basin using a coupled climate-runoff model 133

Kohl, B, Markart, G. (Austria): Dependence of surface runoff on rain intensity -Results of rain simulation experiments 139

Korytny, L. M., Abasov, N. V., Berezhnykh, T. V., Kichygina, N. V. (Russia): Genetic and statistical analysis of the maximum river runoff in East Siberia as the ground for modelling and forecasting inundations 147

Krahe, P., Herpertz, D., Buiteveld, H., Busch, N., Eberle, M., Engel, H., Helbig, A., Naef, F., Wilke, K. (Germany): Development of methodologies for the analysis of the efficiency of flood reduction measures in the Rhine basin on the basis of reference floods (DEFLOOD) 155

Kurtenbach, A., Krein, A., Symader, W. (Germany): The dynamics of contaminant transport at different scales during natural and artificial flood events 165

Lammersen, R., Ritter, N., Buiteveld, H., Disse, M., Engel, H., Hundecha, Y. (the Netherlands): Simulating the effects of reducing measures on the flood conditions of the river Rhine 175

Liener Hegg, S., Kienholz, H., Weingartner, R. (Switzerland): Analysis of flood events in steep mountain torrent 185

Moramarco, T., Melone, F. (Italy): Accuracy of kinematic wave and diffusion wave for flood process in natural channels 193

Rico M., Benito, G. (Spain): Assessment of floods in a small mountain stream (Spanish Pyrenees) 203

Roslan, Z. A., Janmaizatulriah, J. (Malaysia): Assessment on rainfall erosivity with regard to the flood occurrence at the major river of *peninsular Malaysia* 211

Scherrer, S., Demuth, N., Meuser, A., (Switzerland): A procedure for the identification of dominant runoff processes by field investigations to delineate the relevant contributing areas for flood modelling 219

Schotterer, U., Stichler, W., Bürki, H., Kozel, R., Nyfeler, P., Stocker, T., Trimborn, P. (Switzerland): The influence of floods on the water balance of river basins by means of isotopes of the water molecule 229

Seibert, J. (Sweden): Does improved model calibration lead to more accurate flood estimation? 237

Skaugen, T., Astrup, M., Langsholt, E. G., Onof, Ch., Udnæs, H.-Ch. (Norway): Using simulated time series of rainfall and temperature for design and long term flood warnings 247

Susilo, G. E., Prayogo, T. B. (Canada): Flood discharge estimation using storage function method (case study: The Lesti River basin, Indonesia) 255

Telvari, A., Saghafian, B., Sharifi, F. (Iran): The great 2001 flood in Golestan Province, Iran: causes and consequences 263

Thompson, C. S. (New Zealand): The high intensity rainfall design system: HIRDS 273

Topic 3: Extreme Value Statistics 283

Chbab, E.H., van Noortwijk, J. M., Kalk, H. J. (the Netherlands): Bayesian estimation of extreme river discharge 285

Le Clerc, S., Lang, M. (France): Flood frequency analysis downstream confluences. Comparison between bivariate densities and experimental datas 295

McKerchar, A. I. (New Zealand): Shifts in flood frequency due to climate variability 305

Merz, R., Blöschl, G. (Austria): Estimating flood probabilities at the regional scale 315

Painter, D. J. (New Zealand): Seasonal flood probability for South Canterbury New Zealand Rivers 325

Porhemmat, J., Sedghi, H. (Iran): An estimate of probable maximum flood in large mountainous basins (a case of Karun basin in Iran) 335

Senaratne, S., Cunnane, C. (Ireland): Relative worth of the regression estimates of floods - comparison of the procedures 347

Steinbrich, A., Uhlenbrook, St., Sancak, S. Leibundgut, Ch. (Germany): Relevance of the seasonality of precipitation and floods 357

Topic 4: Modelling and Regionalisation of Floods 367

Ashkar, F., El-Jabi, N. (Canada): Regional flood data analysis using peaks over threshold 369

Avdyli, B., Pano, N. (Albania): Maximum floods and their regionalisation on the Albanian hydrographic network 379

Boillat, J.-L., Dubois, J., Schleiss, A., Jordan, F. (Switzerland): Flood modelling and prevention in the Rhone basin upstream of Lake Geneva 389

Bürgi, T. (Switzerland): Operational flood forecasting in mountainous areas - An interdisciplinary challenge 397

Burlando, P., Kuntner, R. (Switzerland): Parsimonious and spatially distributed modelling of runoff generation in mesoscale prealpine and alpine catchments 407

Capkun, G., Davison, A. C., Musy, A. (Switzerland): Joint modelling of mean and dispersion with application to a rainfall-runoff transfer model 419

Castellarin, A., Brath, A. (Italy): Descriptive capability of seasonality indicators for regional frequency analysis of flood and rainfall 429

De Roo, A., Thieken, J., Gouweleeuw, B., Schmuck, G. (Italy): Use of mesoscale weather forecasting for early flood warning on European scale 441

Dubois, J., Boillat, J.-L., Schleiss, A. (Switzerland): FAITOU: A physically based and spatially distributed numerical model for extreme flood simulations 451

Eberle, M., Buiteveld, H., Beersma, J., Krahe, P., Wilke, K. (Germany): Estimation of extreme floods in the River Rhine basin by combining precipitation-runoff modelling and a rainfall generator 459

Faeh, A., Cavelti, B., Zarn, B., Müller-Lemans, H. (Switzerland): The flood estimation puzzle 469

Gerlinger, K., Demuth, N., Ludwig, K. (Germany): Effects of grid resolution and precipitation interpolation on a mesoscale flood forecast model 479

Hegg, Ch., Forster, F. (Switzerland): A suggestion for the estimation of peak flood discharges in small torrential catchments 489

Hingray, B., Niggli, M., Talamba, D., Musy, A. (Switzerland): Regionalisation of annual floods - An adaptive method to errors and data uncertainities 499

Jasper, K., Gurtz, J., Lang, H. (Switzerland): Evaluation and intercomparison of atmospheric model driven flood runoff simulations in the Lago Maggiore Basin 507

Job D., Humbel, M., Müller, D., Sagna, J. (Switzerland): Flood estimation Buenz Valley, Switzerland. Practical use of rainfall-runoff models 519

Kohnová, S., Szolgay, J. (Slovak Republic): Practical applicability of regional methods for design flood computation in Slovakia 529

Kouwen, N., Benoit, R. (Canada): Regional forecasting of river flows using a high resolution numerical weather model coupled to a hydrological model 539

Kron, W., Willems, W. (Germany): Flood risk zoning and loss accumulation analysis for Germany 549

Lamb, R., Calver, A., Kay, A. L. (United Kingdom): A national system for flood frequency estimation in Great Britain using continuous catchment simulation: Confidence and uncertainties 559

Lobanov, V. A., Lobanova, H. V. (Russia): Methodology of time-space flood modelling in changing conditions 567

Merz, B., Thieken, A., Blöschl, G.(Germany): Uncertainty analysis for flood risk estimation 577

Moretti, G., Montanari, A., Brath, A. (Italy): On the use of simulation techniques for the estimation of peak river flows 587

Neff, H.-P, Ihringer, J. (Germany): Regionalisation model for flood events in Baden-Wuerttemberg based on a multiple linear regression model 601

Niggli, M., Hingray, B., Musy, A. (Switzerland): Regional estimation of model parameters - A case study in Western Europe 611

Pearson, C. P. (New Zealand): Regional flood estimation experiences in New Zealand 621

Perrin, Ch., Michel, C. (France): Robustness of two flood estimation methods with data availability 629

Pertziger, F. Baumgartner, M., Kobilov, T., Schultz, A., Vasilina, L. (Uzbekistan): Model of snow cover formation and methodics of long-term prediction of inflow into water reservoir during flood season 637

Rodda, H. J. E., Berger, A. (United Kingdom): The application of flood modelling and mapping for managing flood risk in the UK 645

Schatzl, R. (Austria): Correlation between basin characteristics and extreme flood values 651

Schulz, W., Merkel, U., Bach, H., Appel, F., Ludwig, R., Löw, A., Mauser, W. (Germany): INFERNO - Integration of remote sensing data in operational water balance and flood prediction modelling 659

Schumann, A. H., Pfützner, B. (Germany): Regionalized flood estimation at ungauged sites supported by GIS 669

Shrestha, R. R., Theobald, St., Nestmann, F. (Germany): Flood risk modelling of Babai River in Nepal 679

Solín, L. (Slovak Republic): Regional flood frequency analysis: Identification of physical regional types 687

Stanescu, V. A. (Romania): Outstanding floods in Europe: A regionalisation and comparison 697

Stanescu, V. A. (Romania), Ungureanu, V. (Romania), Domokos, M. (Hungary): Regionalisation of the peak discharge in the Danube Basin 707

Telvari, A. L., Islami, A. (Iran): Regional flood frequency in north basins of Iran 717

Todini, E., Liu, Z., (Italy): TOPKAPI: A physically based rainfall-runoff model 727

Vogt, St., Forster, F., Hegg, Chr. (Switzerland): Clark-WSL - A method for the estimation of flood hydrographs in small torrential catchments 739

Zugaj, R. (Croatia): Maximum annual discharges in overgrown Croation Karst 749

Poster Presentations

All Topics 759

Blazkova, S., Beven, K. (Czech Republic): Estimating extreme floods using various likelihood measures within the GLUE uncertainty framework 761

Deutsch, M., Spanknebel, G., Pörtge, K.-H. (Germany): Flood measurement techniques in present and past 763

Lobanova, H., Lobanov, V. (Russia): Estimation of design floods in changing conditions 765

Mengelkamp, H.-T., Backhaus, R., Ewertowski, R., Klein, M., Messal, H. Wozniak, Z. (Germany): ODRAFLOOD - A flood forecasting system for the Odra drainage basin 769

Naghettini, M., de Oliveira Cândido, M. (Brasil): A knowledge-based expert system for selecting a probability distribution function for frequency analysis of hydrological annual maxima at a site 773

Parida, B. P. (Botswana): Effect of measurement error in flood estimation 775

Ramirez, A. I., Aldama, A. A. (Mexico): The joint return period of peak discharge and volume: a new base for flood estimation 779

Rozhdestvensky, A. V., Lobanov, V. (Russia): Monitoring of design floods as a basis of safety for hydraulic engineering structures 783

Ruiz, A., González, X., Herms, I., Bastianelli, I. (Spain): Flood risk mapping based on airborne laser scanner data: Case of the Llobregat River 785

Schädel, W., Becker, R. (Germany): Concept for the improvement of flood warning by distributed soil moisture measurements 787

Weingartner, R., Hauser, F. (Switzerland): Flood Estimation using the "Hydrological Atlas of Switzerland" 789

Werner, M. (the Netherlands): Flood inundation modelling: a comparison of approaches through predictive uncertainties and the value of spatial data 791

Wiesmann, A., Wegmüller, U., Honikel, M. Strozzi, T. Werner, Ch. (Switzerland): Flood mapping with satellite synthetic aperture radar. 793
