Preface	xiii

INTRODUCTION

Chapter 1	River Management—Objectives and Applications P. Mellquist	1
-----------	---	---

SECTION I THE CASE FOR CONSERVATION

Chapter 2	Essential Elements in the Case for River Conservation P. J. Boon	11
Chapter 3	The River Vistula and its Floodplain Valley (Poland): Its Ecology and Importance for Conservation Z. Kajak	35
Chapter 4	Conservation and Management of the Coastal Streams of Israel: An Assessment of Stream Status and Prospects for Rehabilitation A. Gasith	51
Chapter 5	Degradation of Australian Streams and Progress towards Conservation and Management in Victoria L. A. Barmuta, R. Marchant, and P. S. Lake	65
Chapter 6	The Rivers of Northern Trinidad: Conservation of Fish Communities for Research B. H. Seghers	81

SECTION II RIVER CLASSIFICATION AND THE ASSESSMENT OF CONSERVATION POTENTIAL

Chapter 7	General Principles of Classification and the Assessment of Conservation Potential in Rivers R. J. Naiman, D. G. Lonzarich, T. J. Beechie, and S. C. Ralph	93
-----------	---	----

Chapter 8	Catchment Characteristics and River Ecosystems K. W. Cummins	125
Chapter 9	Anticipating the Consequences of River Management for the Conservation of Macroinvertebrates J. F. Wright, J. H. Blackburn, D. F. Westlake, M. T. Furse, and P. D. Armitage	137
Chapter 10	Use of a Geographic Information System in the Conservation of Rivers in Virginia, USA P. L. Angermeier and A. Bailey	151
Chapter 11	Non-traditional Applications of Instream Flow Techniques for Conserving Habitat of Biota in the Sabie River of Southern Africa J. A. Gore, J. B. Layzer, and I. A. Russell	161
Chapter 12	Importance of a Habitat-level Classification System to Design Instream Flow Studies J. L. Kershner and W. M. Snider	179
Chapter 13	Assessing the Natural Value of New Zealand Rivers K. J. Collier and R. H. S. McColl	195
Chapter 14	Alternative Ways of Classifying Rivers in Southern Africa J. M. King, F. C. de Moor, and F. M. Chutter	213

SECTION III RECOVERY AND REHABILITATION

Chapter 15	Catchment Disturbance and Stream Response: An Overview of Stream Research at Coweeta Hydrologic Laboratory J. R. Webster, S. W. Golladay, E. F. Benfield, J. L. Meyer, W. T. Swank, and J. B. Wallace	231
Chapter 16	Vegetation and River Channel Process Interactions K. J. Gregory	255
Chapter 17	Effects of Weirs on the Littoral Environment of the River Murray, South Australia K. F. Walker, M. C. Thoms, and F. Sheldon	271
Chapter 18	A Building-block Model for Stream Restoration R. C. Petersen, L. B.-M. Petersen, and J. Lacoursière	293
Chapter 19	Habitats as the Building Blocks for River Conservation Assessment D. M. Harper, C. D. Smith, and P. J. Barham	311
Chapter 20	Rehabilitation of Streams in South-west Germany K. Kern	321
Chapter 21	Recovery and Restoration of Some Engineered British River Channels A. Brookes	337

<i>Contents</i>		vii
Chapter 22	Restoration of Salmonid Rivers in Finland E. Jutila	353
Chapter 23	Strategies for Conservation of a Danubian Fish Fauna F. Schiemer and H. Waidbacher	363
SECTION IV PROTECTING RIVERS—LEGISLATION AND PUBLIC PARTICIPATION		
Chapter 24	River Conservation and Catchment Management: A UK Perspective M. D. Newson	385
Chapter 25	Catchment Planning: The Way Forward for River Protection in the UK J. L. Gardiner and L. Cole	397
Chapter 26	Conservation of Rivers in Scotland: Legislative and Organizational Limitations A. E. Brown and D. L. Howell	407
Chapter 27	The Amenity and Environmental Value of River Corridors in Britain C. H. Green and S. M. Tunstall	425
Chapter 28	River Protection in Ontario, Canada: A Case for Holistic Catchment Management D. P. Dodge and R. M. Biette	443
CONCLUSION		
Chapter 29	River Conservation—Future Prospects R. L. Welcomme	453
Index		463
