CONTENTS

Preface ix

Toxic and Hazardous Wastes – Hazardous Waste Issues

S. E. HRUDEY: Hazardous waste management approaches in Canada 1

K.-M. CHO, S.-S. YOON, J.-K. KOO and H.-C. YOO: Status and future perspective of hazardous waste management in Korea 11

P. LITERATHY: Environmental consequences of the Gulf War in Kuwait: impact on water resources 21

I. K. C. SHIN: The situation and the problems of hazardous waste treatment in Germany 31

Toxic and Hazardous Wastes – Fate and Transport

C. MCGAHEY and E. J. BOUWER: Biodegradation of ethylene glycol in simulated subsurface environments 41

R. LEDUC, R. SAMSON, B. AL-BASHIR, J. AL-HAWARI and T. CSEH: Biotic and abiotic disappearance of four PAH compounds from flooded soil under various redox conditions 51

Y. ONO, I. SOMIYA and T. KAWAGUCHI: Genotoxic evaluation on aromatic organochlorine compounds by using *umu* test 61

T. C. HARMON and P. V. ROBERTS: Determining and modeling mass-transfer rate limitations in heterogeneous aquifers 71

Y. SHIMIZU, N. TAKEI and Y. TERASHIMA: Sorption of organic pollutants from vapor phase: the effects of natural solid characteristics and moisture content 79

C. LI and E. A. VOUDRAIS: Difference in transport behavior between aliphatic and aromatic petroleum vapors in unsaturated soil 89

Toxic and Hazardous Wastes – Treatment – Soils

W. W. KOVALICK Jr.: Trends in innovative treatment technologies at contaminated sites 99

B. BATCHELOR: A numerical leaching model for solidified/stabilized wastes 107

J. B. HUGHES and G. F. PARKIN: The effect of mixtures of xenobiotics and primary electron donor on the anaerobic biotransformation of high concentrations of chlorinated aliphatics 117

A. N. CLARKE, R. D. MUTCH Jr., D. J. WILSON and K. H. OMA: Design and implementation of pilot scale surfactant washing/flushing technologies including surfactant reuse 127

Toxics and Hazardous Wastes – Treatment – Organics

J. T. KETTERN: Biological or chemico-physical landfill leachate purification – an alternative or a useful combination 137

D. A. EDWARDS, Z. LIU and R. G. LUTHY: Interactions between nonionic surfactant monomers, hydrophobic organic compounds and soil 147

S.-C. WU and R.-A. DOONG: The effect of oxidation-reduction potential on the biotransformations of chlorinated hydrocarbons 159

J. P. GOULD and G. V. ULIRSCH: Kinetics of the heterogeneous ozonation of nitrated phenols 169

Toxics and Hazardous Wastes – Treatment – Metals

T. H. HSIA, S. L. LO and C. F. LIN: Interaction of Cr(VI) with amorphous iron oxide: adsorption density and surface charge 181

C. N. MAZIDJI, B. KOOPMAN and G. BITTON: Chelating resin versus ion-exchange resin for heavy metal removal in toxicity fractionation 189

J. F. BLAIS, R. D. TYAGI, J. C. AUCLAIR and C. P. HUANG: Comparison of acid and microbial leaching for metal removal from municipal sludge 197

K. ZOTTER and I. LICSKÓ: Removal of chromium (VI) and other heavy metals from groundwaters in neutral and alkaline media 207

A. KUDO: Natural and artificial mercury decontamination – Ottawa River and Minamata Bay (Yatsushiro Sea) 217

S. GHOSH and S. BUPP: Stimulation of biological uptake of heavy metals 227

V. TARE, S. CHAUDHARI and M. JAWED: Comparative evaluation of soluble and insoluble xanthate process for heavy metal removal from wastewaters 237

H. UTSUMI, K. KIYOSHIGE, C. MITADE, K.-S. HAN, M. HAKODA, H. MANABE and A. HAMADA: Mutagenicity and cytotoxicity of tap and raw water and their potential risk 247

J. J. ROSENTRETER and R. K. SKOGERBOE: A method development for the routine analytical monitoring of aqueous cyanide species 255

Chemical and Petrochemical Waste Treatment – Pollution Prevention and Waste Minimization

A. J. ENGLANDE Jr. and C. F. GUARINO: Toxics management in the chemical and petrochemical industries 263

J. A. FAVA and A. PAGE: Application of product life-cycle assessment to product stewardship and pollution prevention programs 275

D. L. BROSKY: Pollution prevention: a part of your waste management program 289

K. N. WOOD and A. L. BISHOP: Effluent guidelines compliance through waste minimization 301

S. E. SADEK, J. G. LEE, R. B. LUND and W. W. McCONNELL: Waste reduction by process improvement in brightener intermediates production 309

K. H. TROBISCH: Recent developments in the treatment of chemical waste water in Europe 319

Chemical and Petrochemical Waste Treatment – Innovative Treatment Technologies

A. BAKER and P. DOLD: Activated sludge treatment of petroleum refinery wastewater: part 1 – experimental behaviour 333

J. P. MAREE, P. DU PLESSIS and C. J. VAN DER WALT: Treatment of acidic effluents with limestone instead of lime 345

T. L. HU: Sorption of reactive dyes by *Aeromonas* biomass 357

X. LI, P. FITZGERALD and L. BOWEN: Sensitized photo-degradation of chlorophenols in a continuous flow reactor system 367

F. ÇEÇEN: Physicochemical and biological treatability studies on surfactant wastewaters 377

Pulp and Paper Waste Treatment

E. R. HALL and W. G. RANDLE: AOX removal from bleached kraft mill wastewater: a comparison of three biological treatment processes 387

R. BREZNY, T. W. JOYCE and B. GONZALEZ: Biotransformation in soil of chloroaromatic compounds related to bleach plant effluents 397

D. A. BARTON, J. J. MCKEOWN and W. CHUDYK: VOC fate model verification at multiple pulp mill wastewater treatment sites 407

C. W. BRYANT, J. J. AVENELL, W. A. BARKLEY and R. N. THUT: The removal of chlorinated organics from conventional pulp and paper wastewater treatment systems 417

C. A. JACKSON-MOSS, J. P. MAREE and S. C. WOTTON: Treatment of bleach plant effluent with the biological granular activated carbon process 427

F. ÇEÇEN, W. URBAN and R. HABERL: Biological and advanced treatment of sulfate pulp bleaching effluents 435

M. C. BARASCUD, F. EHLINGER, M. PICHON and J. ROUGER: COD removal in a closed water circuit of a papermill by an anaerobic fluidized bed reactor 445

TOXIC AND HAZARDOUS WASTES – HAZARDOUS WASTE ISSUES
