CONTENTS

Biofilm Processes

B. DALMACIJA, Z. TAMAŠ, D. MIŠKOVIC, E. KARLOVIC and O. PETROVIC: The biosorption of selected pesticides from water by biologically activated carbon 1991

B. M. PEYTON and W. G. CHARACKLIS: Kinetics of biofilm detachment 1995

N. IWAMI, A. IMAI, Y. INAMORI and R. SUDO: Treatment of a landfill leachate containing refractory organics and ammonium nitrogen by the microorganism-attached activated carbon fluidized bed process 1999

M. KONDO, S. HOZO and Y. INAMORI: Simultaneous removal of BOD and nitrogen with anoxic/oxic porous biomass support systems 2003

Y. HOSOKAWA, T. OOTSUKI and C. NIWA: Channel experiments on coastal water purification by porous bed using crushed stones 2007

R. M. HOZALSKI, S. GOEL and E. J. BOUWER: Use of biofiltration for removal of natural organic matter to achieve biologically stable drinking water 2011

L. TIJHUIS, L. P. M. VAN DER PLUYM, M. C. M. VAN LOOSDRECHT and J. J. HEIJNEN: Formation of biofilms on small suspended particles in airlift reactors 2015

M. TAKASAKI, R. SUDO, O. NISHIMURA and H. Y. KIM: Simultaneous removal of nitrogen and THM precursor by developed submerged biofilm process for drinking water 2021

S. SANIN and J. BRYERS: Hydrodynamics of cell suspension flow and biofilm formation in porous media: a laboratory study 2025

R. F. GONÇALVES and F. ROGALLA: Continuous biological phosphorus removal in a biofilm reactor 2027

W. NISHIJIMA, M. TOJO, M. OKADA and A. MURAKAMI: Biodegradation of organic substances by biological activated carbon – simulation of bacterial activity on granular activated carbon 2031

H. TSUNO, I. SOMIYA, N. MATSUMOTO and S. SASAI: Attached growth reactor for BOD removal and nitrification with polyurethane foam medium 2035

B. WANG, G. LI, Q. YANG and R. LIU: Nitrogen removal by submerged biofilm process with fibrous carriers 2039

F. ROGALLA and J. SIBONY: Biocarbone aerated filters – ten years after: past, present and plenty of potential 2043

Chemical and Industrial Wastes

G. BUITRÓN, A. KOEFOED and B. CAPDEVILLE: Microbial activity evolution during the acclimation of a mixed culture to phenol: use of CO_2 evolution rate as indicator 2049

S. OKOUCHI, O. NOJIMA and T. ARAI: Cavitation-induced degradation of phenol by ultrasound 2053

S. WADA, H. ICHIKAWA and K. TATSUMI: Removal of phenols with tyrosinase immobilized on magnetite 2057

Y. SABEH and K. S. NARASIAH: Degradation rate of aircraft deicing fluid in a sequential biological reactor 2061

U. AUSTERMANN-HAUN and C. F. SEYFRIED: Anaerobic–aerobic wastewater treatment plant of a potato chips factory 2065

P. LE CLOIREC, P. HORNY and A. LADOUSSE: Anaerobic biological removal of dimethyldisulfide in a chemical process wastewater 2069

S. SOKOLOVIC, R. SECEROV-SOKOLOVIC and S. SEVIC: Two-stage coalescer for oil/water separation 2073

S. J. DE LUCA, M. CANTELLI and M. A. DE LUCA: Ferrate vs traditional coagulants in the treatment of combined industrial wastes 2077

W. S. KUO and R. W. REGAN Sr: Degradation of carbaryl and 1-naphthol by spent mushroom compost microorganisms 2081

J. P. STOWELL, J. N. JENSEN and A. S. WEBER: Sequential chemical/biological oxidation of 2-chlorophenol 2085

U. J. NDON, A. D. LEVINE and B. S. BRADLEY: Evaluation of biodegradability of starch-based plastics 2089

Y. ZAOYAN, S. KE, S. GUANGLIANG, Y. FAN, D JINSHAN and M. HUANIAN: Anaerobic–aerobic treatment of a dye wastewater by combination of RBC with activated sludge 2093

E. A. DUARTE, B. MENDES and J. S. OLIVEIRA: Valorization of solid wastes from biomethanisation of pig breeding effluents 2097

R. A. OELLERMANN, T. RONEN and V. MEYER: Biodegradation of wool scouring effluent on a laboratory scale 2101

I. ÖZTÜRK, V. EROGLU and A. BASTÜRK: Sludge utilization and reduction experiences in the pulp and paper industry 2105

J. G. CLEARY, T. J. BOEHM and R. J. GEARY: Biotower pilot study results for a photographic and specialty paper manufacturer 2109

C. J. LU and S. J. CHEN: The effects of the secondary carbon source on the biodegradation of chlorinated phenols in biofilm reactors 2113

E. MEINTJIES and V. MAHARAJ: Evaluation of South African raw and drinking water supplies for volatile organic complexes potentially hazardous to human health 2117

S. SUSARLA, G. V. BHASKAR and S. M. R. BHAMIDIMARRI: Competitive adsorption of phenoxy herbicide chemicals in soil 2121

J. B. CARBERRY and L. E. KOVACH: Decrease in toxicity of pentachlorophenol and toluene to growth of selected microbial consortia and activated sludge by pretreatment with *Phanerochaete chrysosporium* 2125

Metals and Radionuclides

D. MIŠKOVIC, Lj. CONKIC, B. DALMACIJA and M. GANTAR: Removal of some radionuclides from water by bioaccumulation 2129

K. MORIYAMA, Y. KOBAYASHI, T. MORI, H. NAKAHARA and M. CHINO: Accumulation of zinc in activated sludge 2133

P. L. CARLO, L. P. OWENS, G. P. HANNA Jr. and K. E. LONGLEY: The removal of selenium from water by slow sand filtration 2137

Y. WANG and P. R. ANDERSON: Effect of the surface characteristics of seed on copper precipitation 2141

A. A. PRADHAN and A. D. LEVINE: Experimental evaluation of microbial metal uptake by individual components of a microbial biosorption system 2145

A. GRAPPELLI, L. CAMPANELLA, E. CARDARELLI, F. MAZZEI, M. CORDATORE and W. PIETROSANTI: Metals removal and recovery by *Arthrobacter* sp. biomass 2149

A. A. PRADHAN and A. D. LEVINE: Role of extracellular components in microbial biosorption of copper and lead 2153

Microbiology

K. TATSUMI, S. WADA, H. ICHIKAWA, S.-Y. LIU and J.-M. BOLLAG: Cross-coupling of a chloroaniline and phenolic acids catalyzed by a fungal enzyme 2157

Y. INAMORI, K. MURAKAMI, R. SUDO, Y. KURIHARA and N. TANAKA: Environmental assessment method for field release of genetically engineered microorganisms using microcosm systems 2161

K. MURAKAMI, Y. INAMORI, R. SUDO and Y. KURIHARA: Effect of temperature on prosperity and decay of genetically engineered microorganisms in microcosm system 2165

E. A. DUARTE, B. MENDES and J. S. OLIVEIRA: Removal of *Salmonella*, *Streptococci* and coliforms in pig breeding effluent by anaerobic mesophilic digestion 2169

N. SUGIURA, Y. INAMORI, T. OUCHIYAMA and R. SUDO: Degradation of cyanobacteria, *Microcystis* by microflagellate, *Monas guttula* 2173

P. A. M. ARTS, L. A. ROBERTSON, P. BOS and J. G. KUENEN: Growth of *Thiosphaera pantotropha* in a continuous-flow stirred tank reactor 2177

E. M. DAVIS, D. L. MANVILLE, J. J. MATHEWSON and G. W. MERIWETHER III: Investigation of bacterial populations producing elevated MPN values and false positive fecal coliform counts and applicable disinfectants in an industrial wastewater 2181

D. F. SANIN, P. A. VESILIND and J. J. MARTEL: Pathogen reduction capabilities of freeze/thaw sludge conditioning 2183

S. R. RIPPEY and W. D. WATKINS: Comparative rates of disinfection of microbial indicator organisms in chlorinated sewage effluents 2185

M. FUJITA, M. IKE and T. KAMIYA: Accelerated phenol removal by amplifying the metabolic pathway with a recombinant plasmid encoding catechol 2,3 oxygenase 2191

Nutrient Control and Removal

S. A. McCLINTOCK, V. M. PATTARKINE and C. W. RANDALL: Comparison of yields and decay rates for a biological nutrient removal process and a conventional activated sludge process 2195

D. WEDI: Effects of an activated primary settling tank on biological phosphorus removal 2199

L. F. RICKARD and S. A. McCLINTOCK: Potassium and magnesium requirements for enhanced biological phosphorus removal from wastewater 2203

L. TIJHUIS, M. C. M. VAN LOOSDRECHT and J. J. HEIJNEN: Nitrification with biofilms on small suspended particles in airlift reactors 2207

G. N. REES, G. VASILIADIS, J. W. MAY and R. C. BAYLY: Polyphosphate and poly-β-hydroxybutyrate production in *Acinetobacter* spp. isolated from activated sludge 2213

K. E. NEU: Achievement of biological nutrient removal in a full-scale rotating biological contactor wastewater treatment plant 2217

M. W. WABLE and C. W. RANDALL: Investigation of reduction in oxygen requirements of biological phosphorus removal systems 2221

F. ÇEÇEN and I. E. GÖNENÇ: Nitrification–denitrification of high-strength nitrogen wastes in two up-flow submerged filters 2225

K. M. WEBB and G. E. HO: Struvite ($MgNH_4PO_4.6H_2O$) solubility and its application to a piggery effluent problem 2229

S. J. KANG, W. F. BAILEY and D. JENKINS: Biological nutrient removal at the Blue Plains Wastewater Treatment Plant in Washington, D.C. 2233

D. SEN, C. W. RANDALL, R. R. COPITHORN and T. J. GRIZZARD: Critical design and process control features to optimize biological nutrient removal in temperate climates 2237

P. HARTWIG and C. F. SEYFRIED: The combined biological and nitrogen and phosphorus removal – design and large-scale experiences 2241

Ma. DEL CARMEN DORIA-SERRANO, S. GONZÁLEZ-MARTÍNEZ and M. HERNÁNDEZ-ESPARZA: Biochemical models for phosphate accumulating microorganisms 2245

F. F. KOLBÉ and J. S. TERBLANCHE: Phosphate precipitation with on-site alkali generation 2249

M. C. GORONSZY: Full-scale cyclic activated sludge system phosphorus removal 2253

Physicochemical Processes

M. KOGA, K. KADOKAMI and R. SHINOHARA: Laboratory-scale ozonation of water contaminated with trace pesticides 2257

M. Th. STEGER: Fate of chlorinated organic compounds during thermal conversion of sewage sludge 2261

D. E. SAWYERS and S. K. DENTEL: Anoxic, zero-headspace titrations of landfill leachate 2265

Š. CERJAN-STEFANOVIC, M. KAŠTELAN-MACAN and T. FILIPAN: Ion exchange characterisation of modified zeolite 2269

R. HABERL and Ch. SALZER: Dewatering of sewage sludge with vacuum assisted sludge dewatering beds 2273

S. CHELLAM and M. R. WIESNER: Macrocolloidal transport in membrane filters in slow laminar flows: polarization chromatography 2277

D. BREJCHOVA and M. R. WIESNER: Effect of delaying the addition of polymeric coagulant - aid on settled water turbidity 2281

S. VEERAPANENI, D. BREJCHOVA, D. C. SCHMELLING, F. F. NAZZAL and M. R. WIESNER: Pilot evaluation of ceramic membranes in surface water treatment with coagulant pretreatment 2285

S. R. MUKHERJEE and A. D. LEVINE: Chemical solubilization of particulate organics as a pretreatment approach 2289

F. A. CRAVEIRO DE SA and J. F. MALINA Jr: Bioregeneration of granular-activated carbon 2293

J. MARTINS and R. FERNANDES: Hydrophobic expanded vermiculite as a cleaning agent for contaminated waters 2297

C. F. LIN, W. ROU and K. S. LO: Treatment strategy for Cr(VI)-bearing wastes 2301

Z. XUE, Z. HUA and N. YAO: Application of electrodialysis in purification and reuse of spent alkaline process streams 2305

J. S. D'AVILA, C. M. MATOS and M. R. CAVALCANTI: Heavy metals removal from wastewater by using activated peat 2309

J. SOBOTKA: Application of ultraviolet radiation for water disinfection and purification in Poland 2313

Soil and Groundwater

R. NETTER: The purification efficiency of planted soil filters for wastewater treatment 2317

A. ALI: Contamination of alluvial aquifers by metal industries in parts of Central Ganga Basin, India 2321

C.-M. KAO and R. C. BORDEN: Use of biologically active barriers for *in situ* treatment of contaminated groundwater 2325

J. LEE, B. CHEN, H. E. ALLEN, C. P. HUANG, D. L. SPARKS and P. SANDERS: Trace metal soil quality criteria to protect groundwater 2327

A. O. ADENUGA, J. H. JOHNSON Jr., J. N. CANNON and L. WAN: Bioremediation of PAH-contaminated soil via in-vessel composting 2331

R. T. PAULSEN, A. E. MOOSE and V. M. WHITLEDGE: Interpretation of the STORET data base for atrazine in groundwater using a geographic information system 2335

Z. LIU, D. A. EDWARDS and R. G. LUTHY: Nonionic surfactant sorption onto soil 2337

D. A. EDWARDS, Z. LIU and R. G. LUTHY: Enhancing polynuclear aromatic uptake into bulk solution with amphiphilic colloidal aggregates 2341

Toxic Assessment

C. N. HAAS: A new approach for the analysis of mixture toxicity data 2345

A. KHAN, D. KENT, J. BARBIERI, S. KHAN and F. SWEENEY: Effectiveness of a secondary impoundment system in reducing industrial wastewater toxicity 2349

A. KHAN, D. KENT, J. BARBIERI and S. KHAN: Chronic toxicity of a fluoride mixture to freshwater organisms 2353

J. ZAGORC-KONCAN and M. DULAR: Evaluation of toxicity in receiving streams 2357

M. VOJINOVIC-MILORADOV, P. MARJANOVIC, D. BUZAROV, S. PAVKOV, Lj. DIMITRIJEVIC and M. MILORADOV: Bioaccumulation of polychlorinated biphenyls and organochlorine pesticides in selected fish species as an indicator of the pollution of aquatic resources in Vojvodina, Yugoslavia 2361

L. CINGOLANI and A. MOROSI: Evaluation of landfill effects on aquatic ecosystems using benthic macro-invertebrates 2365

P. E. HECK, I. J. MASSEY and M. D. AITKEN: Toxicity of reaction products from enzymatic oxidation of phenolic pollutants 2369

L. S. GARTON, J. S. BONNER, A. N. ERNEST and R. L. AUTENRIETH: Exposure assessment for the New Bedford Harbor Superfund site 2373

Treatment Processes and Systems

S.-K. TSENG, R.-T. LIN and K.-L. LIAU: Verification of dispersion model on anaerobic reaction simulation 2377

C. POLPRASERT, S. KESSOMBOON and W. KANJANAPRAPIN: Pig wastewater treatment in water hyacinth ponds 2381

T. SATO, H. YAMAMORI, H. MATSUDA, H. NAGASE and H. KITO: An estimation of safety of ozonation and chlorination of a water purification plant 2385

D. P. SMITH: Spherical diffusion model of interspecies hydrogen transfer in steady-state methanogenic reactors 2389

R. SUTTON: Use of biosurfactants produced by *Nocardia amarae* for removal and recovery of non-ionic organics from aqueous solutions 2393

H. ASANO, H. MYOGA, M. ASANO and M. TOYAO: Nitrification treatability of whole microorganisms immobilized by the PVA-freezing method 2397

S. KURIBAYASHI: Experimental studies on advanced treatment of wastewater for amenity use 2401

P. BATTISTONI, G. FAVA and A. GATTO: High load trickling filters. Biofilm accumulation and sludge production 2405

F. CECCHI, P. PAVAN, A. MUSACCO, J. MATA-ALVAREZ and C. SANS: Comparison between thermophilic and mesophilic anaerobic digestion of sewage sludge coming from urban wastewater treatment plants 2409

H. SPANJERS and G. OLSSON: On-line diagnosis of DO-probe condition in the activated sludge process 2413

A. B. PINCINCE: Concepts for minimizing emissions at activated sludge plants 2417

Y. T. CHYI and A. D. LEVINE: Solubilization of particulate cellulose using anaerobic acidogenesis 2421

X.-W. LI: Computer-aided design for stabilization ponds 2425

R. R. DAGUE, C. E. HABBEN and S. R. PIDAPARTI: Initial studies on the anaerobic sequencing batch reactor 2429

B. W. BUNCH and D. M. GRIFFIN Jr.: Rapid removal of colloidal organics from domestic wastewater 2433

K. THATCHER: Fine bubble aeration using a high density diffuser system 2437

Y.-S. CAO, H. ZHANG and Y.-Z. LI: UASB treatment of monosodium glutamate wastewater; dynamic and kinetic behaviour of the start-up of the reactor 2441

M. DOHMANN, T. GRÜNEBAUM and J. P. SANZ: Studies aimed at improving wastewater filtration in terms of COD and AOX elimination 2445

C.-F. OUYANG and H.-Y. LIN: A study of controlled recirculation of anaerobic activated sludge digestion reactors 2449

A. MATSUMOTO, M. SAKAMOTO and T. NOIKE: A new operation of carbohydrate-containing wastewater treatment in an anaerobic fluidized bed system 2453

Y. UBUKATA: Kinetics of polymeric substrate removal by activated sludge: hydrolysis of polymers is the rate-determining step 2457

R. D. TYAGI and Y. G. DU: Operational determination of the activated sludge process using neural networks 2461

K. SUGRUE, G. KIELY and E. McKEOGH: A pilot plant study of the anaerobic digestion of a mixture of municipal sewage and industrial sludges 2465

S. ARORA and T. MINO: An experimental investigation of mechanism and operating conditions of multi-stage reversing-flow bioreactor (MRB) in treating domestic wastewater 2469

Wastewater Treatment

Yu. A. ERMOLIN and V. A. ZAGORSKY: Practice of quasi-optimum controlling urban sewage conveyance system of Moscow 2473

P. CHUDOBA, J. CHUDOBA and B. CAPDEVILLE: The aspect of energetic uncoupling of microbial growth in activated sludge process – OSA system 2477

J. CAI, Th. J. NIEUWSTAD and J. H. KOP: Fluidization and sedimentation of carrier material in a pilot-scale airlift internal-loop reactor 2481

I. ROHRER: Infiltration of pretreated wastewater from stormwater overflow tanks 2485

M. BRECHENMACHER, H. WIRTH and K. GAEFFGEN: Investigations on large storm-water retention tanks in Munich 2489

T. IYO, T. YOSHINO and S. OHNO: Suppressive effects on filamentous bulking by addition of corn cob flour and divalent metal ions 2493

C. HANSON, K. ATASI, J. PACKMAN, E. SINGLETON and A. GLYMPH: A case study relating activated sludge nutrient loadings to the appearance of *Nocardia* spp. foaming 2497

M. Y. KIGEL and J. F. SHULTIS: Wastewater treatment technologies accomplished in a pseudofluidized bed reactor 2501

R. CLYDE: Cells on rotating fibers for wastewater treatment 2505

R. SECEROV-SOKOLOVIC, S. SOKOLOVIC and B. GALASEV: New technology for wastewater treatment 2507

R. B. BOWEN and B. A. DEMPSEY: Improved performance of activated sludge with addition of inorganic solids 2511

R. P. SCHREIBER, M. J.PAULSEN and D. E. SCHAFER: Training treatment plant operators using the "OPTRAIN" computer simulator 2515

M. COSSIGNANI, L. CINGOLANI, L. GIACCHÉ and R. MILIANI: Investigations on activated sludge microfauna and treatment plant disfunctions 2519

K. L. NORCROSS: Sequencing batch reactors – an overview 2523

E. J. WAHLBERG, T. M. KEINATH and D. S. PARKER: Relationship between activated sludge flocculation characteristics and cell-surface polysaccharide concentration 2527

T. OGNEAN: A new dimensionless criterion for the oxygen transfer efficiency in both surface and subsurface aeration systems 2531

M. ROŠ and M. DULAR: Determination of some kinetic parameters by respirometry 2533

N. S. VOUTCHKOV: Relationship for clarification efficiency of circular secondary clarifiers 2539

M. DEFRAIN and F. SCHMIDT: Solids concentrations in a treatment plant effluent 2543

P. ROMANO and M. RANZANI: Anionic surfactants removal and biodegradation in a large treatment plant 2547

Water Quality

Y. S. SIN and K. W. CHAU: Eutrophication studies on Tolo Harbour, Hong Kong 2551

K. W. CHAU and Y. S. SIN: Correlation of water quality parameters in Tolo Harbour, Hong Kong 2555

Y. LIU and W.-H. ZHU: The way to control water pollution of the Huaihe River 2559

A. ADACHI and T. KOBAYASHI: Influence of motor vehicle exhausts on chemical components in rainwater 2563

K. KAŠTELAN-MACAN, Š. CERJAN-STEFANOVIC and D. JALŠOVEC: TLC determination of aquatic humic acids 2567

K. AMANO and T. FUKUSHIMA: Partitioning of a surfactant between lake water, suspended solids and sediment 2571

V. GOUNARIS, P. R. ANDERSON and T. M. HOLSEN: Characteristics of colloids in landfill leachate 2575

P. ROMANO, R. RANZANI and F. TECCHIATI: Water reclamation of Po River in the Turin area 2579

R. INFANTE, C. GUTIERREZ and C. PÉREZ: The use of liquid–solid extraction, capillary column GC/MS for the analysis of chlorinated acids and phenols in drinking water 2583

A. SMIRNOV: Applied program package for studying impurities transport in streams polluted by point sources 2587

Y. S. SIN: Finite-difference modelling for a one-dimensional rectangular estuary 2591

R. D. KHULBE: Watermolds and their activity in Kumaun Himalaya, India 2595

L. H. LÖTTER: Strategies for dealing with the effects of increasing urbanisation on surface water quality 2599

J. NIEMCZYNOWICZ: Environmental degradation of urban areas – call for realistic alternatives for the developing world 2605

Dh.-T. KOLLATSCH: Total discharges taken into account for comprehensive planning of urban drainage and waste water treatment 2609

I. T. BALKAS, F. JUHASZ, U. YETIS and G. TUNCEL: The Izmir Bay wastewater management project – economical considerations 2613

F. CROCE, J. R. POLLARA, R. L. OLIVERI, M. V. TORREGROSSA and L. VALENTINO: The Carini experimental station for wastewater reuse in agriculture – preliminary indications 2617

T. S. KATKO: Cost recovery in water services 2621

A. GÖTTLE: Natural design and maintenance of rivers and streams – targets, features and conclusions 2625
