A REVIEW OF WASTEWATER DISINFECTION PROCESSES

CONTENTS

SUMMARY		**PAGE**
1.	**INTRODUCTION**	1
2.	**HALOGEN DISINFECTION**	6
2.1	**Chlorine**	6
2.1.1	Introduction	6
2.1.2	Process requirements	6
2.1.3	Costs	10
2.1.4	Microbiology	11
2.1.5	Environmental effects	13
2.1.6	Conclusions	35
2.2	**Chlorine Dioxide**	35
2.2.1	Introduction	35
2.2.2	Process requirements	36
2.2.3	Costs	38
2.2.4	Microbiology	38
2.2.5	Environmental effects	39
2.2.6	Conclusions	41
2.3	**Bromine Chloride**	41
2.3.1	Introduction	41
2.3.2	Process requirements	42
2.3.3	Costs	44
2.3.4	Microbiology	44
2.3.5	Environmental effects	45
2.4.6	Conclusions	50
2.4	**Bromine**	50
2.5	**Iodine**	52
REFERENCES		
3.	**OXIDATION**	61
3.1	**Ozone**	61
3.1.1	Introduction	61
3.1.2	Process requirements	61
3.1.3	Costs	63
3.1.4	Microbiology	64
3.1.5	Environmental effects	65
3.1.6	Conclusions	66
3.2	**Peracetic Acid**	69
3.2.1	Introduction	69
3.2.2	Process requirements	70
3.2.3	Costs	71
3.2.4	Microbiology	71
3.2.5	Environmental effects	72
3.2.6	Conclusions	73
3.3	**Hydrogen Peroxide**	74
REFERENCES		

PAGE

4.	**RADIATION**	79
4.1	**Ultraviolet Radiation**	79
4.1.1	Introduction	79
4.1.2	Process requirements	79
4.1.3	Costs	81
4.1.4	Microbiology	82
4.1.5	Environmental effects	83
4.1.6	Conclusions	84
4.2	**Gamma Radiation**	84

REFERENCES

5.	**pH ADJUSTMENT**	87
5.1	**Lime Treatment**	87
5.1.1	Introduction	87
5.1.2	Process requirements	87
5.1.3	Costs	88
5.1.4	Microbiology	88
5.1.5	Environmental effects	88
5.1.6.	Conclusions	92

REFERENCES

6.	**MISCELLANEOUS DISINFECTION METHODS**	95
6.1	**Heat Treatment**	95
6.2	**Formaldehyde**	95
6.3	**Ultrasonics**	96

REFERENCES

7.	**SUMMARY AND CONCLUSIONS**	99

APPENDIX A.
ORGANIC COMPOUNDS AND TRACE METALS IN SEWAGE

APPENDIX B.
DISINFECTION BYPRODUCTS
B1. CHLORINATION
B2. CHLORINE DIOXIDE
B3. BROMINE CHLORIDE
B4. OZONATION
B5. UV RADIATION
