

Groundwater Quality Management

Edited by

K. KOVAR

*Secretary of the IAHS International Commission on Groundwater,
National Institute of Public Health and Environmental Protection
(RIVM), P.O. Box 1, 3720 BA Bilthoven, The Netherlands*

J. SOVERI

*National Board of Waters and the Environment, P.O. Box 250,
SF-00101 Helsinki 10, Finland*

GQM 93

Proceedings of an international conference held at Tallinn, Estonia, from 6 to 9 September 1993. This conference was jointly organized by:

*the International Commission on Groundwater of the
International Association of Hydrological Sciences
(IAHS) and*

the Institute of Ecology, Tallinn, Estonia

The conference was sponsored and supported by: the Finnish Ministry of Environment, the Estonian Ministry of Environment, the Estonian Academy of Sciences, the International Association of Hydrogeologists (IAH), the International Ground Water Modeling Center (IGWMC), and the Commission of European Communities (CEC).

IAHS Publication No. 220

in the IAHS Series of Proceedings and Reports

**Published by the International Association of
Hydrological Sciences 1994.**

IAHS Press, Institute of Hydrology, Wallingford, Oxfordshire

British Library Cataloguing-in-Publication Data.

A catalogue record for this book is available from the British Library.

IAHS is indebted to the employers of the Editors for their invaluable support and the services provided that enabled the Editors to function effectively and efficiently. Support from the National Institute of Public Health and Environmental Protection (RIVM), Bilthoven, The Netherlands, for the first Editor – Karel Kovar, who produced the camera-ready text for each paper, is particularly appreciated and acknowledged.

The designations employed and the presentation of material throughout the publication do not imply the expression of any opinion whatsoever on the part of IAHS concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

The use of trade, firm, or corporate names in the publication is for the information and convenience of the reader. Such use does not constitute an official endorsement or approval by IAHS of any product or service to the exclusion of others that may be suitable.

It would not have been possible to organize the conference without the dedicated efforts of Dr Jouko Soveri (National Board of Waters and the Environment, Helsinki, Finland) and Ms Katrin Erg (Institute of Ecology, Tallinn, Estonia). Specifically, Dr Soveri, who stood at the cradle of the conference, is thanked for his thoughtful help and many valuable suggestions throughout the preparations for the conference.

Special thanks are given to all others who assisted in organizing the conference. The convenors especially would like to thank the following members of the Scientific Advisory Committee:

<i>Dr Jesús Carrera</i> (Spain)	<i>Dr Wolfgang Kinzelbach</i> (Germany)	<i>Dr Peter Nachtnebel</i> (Austria)
<i>Dr Steven M. Gorelick</i> (USA)	<i>Dr Gert Knutsson</i> (Sweden)	<i>Dr Marek Nawalany</i> (Poland)
<i>Dr S. Majid Hassanizadeh</i> (The Netherlands)	<i>Dr Ghislain de Marsily</i> (France)	<i>Dr Ed A. Sudicky</i> (Canada)
	<i>Dr Valeri A. Mironenko</i> (Russia)	<i>Dr Leo Vallner</i> (Estonia)

The convenors of the conference would also like to express their thanks for financial support obtained from the following companies and institutions:

AS Filmari, Tallinn; Hewlett-Packard, Tallinn, Estonia; Hartwall Beverages Ltd, Helsinki; Kymmene Corporation, Helsinki, Finland; WASY GmbH, Berlin, Germany; Amsterdam Water Supply Company; TNO Institute of Applied Geoscience, Delft, The Netherlands; KEMAKTA KONSULT AB, Stockholm; K-KONSULT, Stockholm, Sweden; Perstorp Analytical Company, USA.

The Editors would like to express their sincere thanks to Dr Terence O'Donnell (IAHS Editor) for editing the English of papers by a number of non-English speaking authors.

Finally, the Editors wish to acknowledge the conference authors for their patience and cooperation during the editing process.

The camera-ready copy for the papers was prepared at the National Institute of Public Health and Environmental Protection (RIVM) by Karel Kovar, and assembled and finished at IAHS Press, Institute of Hydrology, Wallingford, Oxfordshire, UK, by Penny Kisby.

Contents

Preface by <i>J.-M. Punning & K. Kovar</i>	v
--	---

1 Field Investigation and Monitoring

The influence of oil-shale mining on groundwater resources and quality <i>K. Erg & J.-M. Punning</i>	3
Computer simulations of depths to water table using ground-penetrating radar in topographically diverse terrains <i>Thomas A. Iivari & James A. Doolittle</i>	11
Resistivity methods for monitoring spatial and temporal variations in groundwater contamination <i>M. Karous, S. Mares, W.E. Kelly, J. Anton, J. Havelka & V. Stojc</i>	21
The acidification of shallow groundwater and stream waters and its environmental controls in Finland <i>P. Lahermo</i>	29
Contaminant transport and attenuation in fissured argillites — a case study <i>J. Maier & G. Dörhöfer</i>	39
Analysis of the hydrogeological consequences of hypothetical hazardous accidents at nuclear reactors <i>V.A. Mironenko & V.G. Rumynin</i>	49
Effect of organic contaminants in landfill leachates on groundwater quality in Finland <i>M. Niininen, P. Kalliokoski & E. Pärjälä</i>	63
The effect of airborne organic substances on groundwater quality in Germany <i>R. Schleyer, J. Hammer & J. Fillibeck</i>	73
Variation in groundwater quality in South Estonian rural areas <i>Ü. Mander, V. Kuusemets & K. Treier</i>	81
Groundwater pollution by airborne toxic contaminants: a factor to be considered in groundwater management? <i>A.J. Melloul & L.C. Goldenberg</i>	95
Trends in the acidification of groundwater <i>Gert Knutsson</i>	107

2 Physical Processes

Mixing of groundwaters evaluated using environmental isotope data in the Zalaegerszeg area, Hungary <i>J. Deák, I. Fórizs & A. Gunyhó</i>	121
Comparison of laboratory and field measurements of the vertical hydraulic conductivity of clayey silts <i>Petra Döll & Wilfried Schneider</i>	129
The piston model of transient infiltration in unsaturated soil <i>Krzysztof W. Ksiazynski</i>	141

3 Chemical Processes

Numerical simulation of slow, microbially catalyzed redox reactions in a subsurface flow path <i>H.J. Lensing & B. Herrling</i>	151
The fate of ammonium and phosphate in lake sediments <i>M.A.A. Paalman & S.M. Hassanizadeh</i>	161
Modelling groundwater chemical evolution in a closed-basin evaporitic environment <i>J. Samper & C. Ayora</i>	173
Evaluation of groundwater contamination potential of polycyclic aromatic hydrocarbons from ferromanganese sludge by leaching tests <i>J.E. Sorlie, J. Hoff & R.W. Gillham</i>	183
Prediction of metal discharges from sulphidic mine tailings covered with soil <i>F. Brandberg, B. Grundfelt, L.O. Höglund & M. Lindgren</i>	193

4 Stochastics, Variability and Uncertainty

Calibration and predictive uncertainty estimation of groundwater quality models: application to the Twin Lake tracer test <i>Kevin M. Buckley, Andrew M. Binley & Keith J. Beven</i>	205
Accounting for predictive uncertainty in a risk analysis focusing on radiological contamination of groundwater <i>R. Andricevic, R.L. Jacobson & J.I. Daniels</i>	215
Application of Fourier series expansion to two-dimensional stochastic advection-dispersion equation for designing monitoring network and real-time prediction of concentration <i>K. Jinno & A. Kawamura</i>	225
Auxiliary information for estimating aquifer transmissivities: number of samples versus correlation <i>H. Kupfersberger & G. Blöschl</i>	237
Spatial variability, risk and extent of soil pollution: conceptual approach of estimating the exposure of organisms to soil contamination <i>Mari P.J.C. Marinussen & Sjoerd E.A.T.M. Van der Zee</i>	245
Towards identifying data needs for a regional hydrogeologic contamination study using multiple realization simulations <i>James McCord & Alexander Treadway</i>	257
A geostatistical-deterministic methodology for evaluating predictive uncertainty of saltwater intrusion from leakage <i>Luis Ribeiro</i>	271
Anisotropic block-scale permeability and generalized principal directions: a correction to the direction of advective transport <i>W. Zijl & J.M.T. Stam</i>	281
Automatic calibration of groundwater models by the head gradient method <i>Dominique Thiery</i>	291
The role of spatial variability on solute transport model uncertainties <i>J. Carrera & X. Sánchez-Vila</i>	301

5 Numerical Methods

- Computational aspects in developing an interactive 3D groundwater transport simulator using FEM and GIS *H.-J.G. Diersch* 313
- Numerical evaluation of sensitivity due to parameter heterogeneity in transport modelling *E. Holzbecher* 327
- Application of Geographical Information Systems in the analysis of hydrological inputs to a shallow Mediterranean coastal aquifer
P. La Barbera, L. Lanza & F. Siccardi 337
- Streamline calculations using continuous and discontinuous velocity fields and several time integration methods *F.J. Sauter & A.H.W. Beusen* 347
- Accuracy of the calculation of groundwater flow velocity field: comparison of several interpolation algorithms and numerical methods *K. Semra, Ph. Ackerer & R. Mosé* 357
- Modelling the migration of water soluble contaminants through preferred paths in the soil *F. Stagnitti, J.-Y. Parlange, T.S. Steenhuis, B. Nijssen & David Lockington* 367

6 Management and Remediation

- Rehabilitation aspects of groundwater quality management and some relevant laboratory findings *L.C. Goldenberg & A.J. Melloul* 383
- Protection plan for an important groundwater area – a model approach *K.A. Granlund, T.H. Nystén & J.P. Rintala* 393
- Modelling and design of *in-situ* bioremediation measures
Wolfgang Kinzelbach & Wolfgang Schäfer 399
- Furrow irrigation modelling and management for reduced nitrate leaching *A.R. Mitchell, C.C. Shock & J.M. Barnum* 413
- Possibilities and advantages of a dual water distribution system: handling of groundwater contamination from non-point sources
B.W. Pettersen 423
- Experiments on agricultural restrictions carried out in protection areas by the Agence de l'Eau Rhin-Meuse *S. Ramon* 433
- Physical, chemical and biological processes in consequences of *in-situ* treatment of groundwater *U. Rott & R. Meyerhoff* 439
- Problems of groundwater quality management in Estonia *L. Vallner* 449
- Influence on groundwater quality of the Paleozoic Brabant Massif in Belgium due to overexploitation *K. Walraevens, L. Lebbe, M. De Ceukelaire, E. Van Houtte & W. De Breuck* 461

Aquifer-wide groundwater restoration and protection; from concept to practice, an example from Denmark <i>Gerald Hyde, Kent E. Pedersen & Elly Andersen</i>	471
Geotechnical system for groundwater control and cleaning of an aquifer from oily pollutants in Czarny Dunajec, Poland <i>T. Solecki & J.M. Stopa</i>	479
