Hydraulic Engineering Software VI

EDITOR:

W.R. Blain

Wessex Institute of Technology, Southampton, UK

OFFICE INTERNATIONAL DE L'EAU - Direction de la Documentation et des Données -

Computational Mechanics Publications
Southampton Boston

CONTENTS

SECTION 1: HYDROLOGY AND HAZARD ASSESSMENT

Scheduled emptying in reservoir-operation simulation 3
E.C. Kalkani, R.F. Beilicci

Application of a genetic algorithm for calibration and structural modification of Tank Model 11
L.S. Diniz, R.S.S. Góis, V.S. Srinivasan

Optimization algorithm of parameters in the Tank model 21
H. Saga, K. Hoshi

Application of unsaturated flow equation for practical runoff analysis 29
S. Hatta, M. Fujita, Y. Shimizu, A. Tanaka

Stochastic response to storage runoff function model: a case of coefficients and rainfall as random functions 39
M. Kudo, M. Fujita, G. Tanaka

Analysis of hydrologic droughts 49
C.B. Teoh

Numerical simulation of overland flood flows in an urban bay area 59
M. Takeda, T, Uetsuka, K. Inoue, K. Toda

SECTION 2: WATER QUALITY AND AQUIFER MODELLING

AQUIVAL: A GUI for groundwater modelling incorporated into the simulation of complex water resources systems 71
J.E. Capilla, A. Joaquín

Aquifer recharge in coastal areas of Southern Italy 81
M. Benedini, C. Masciopinto, E. Gagliardi

Contaminant transport to covered drains 91
T. Youssef

Application of modelling techniques in a groundwater nitrate pollution problem 101
P. Latinopoulos, A. Xefteris, P. Anastasiadis, N. Theodosiou

Bantayan Island water resources study 111
P.M. Angus Jr, D.T. Jaque

HAM: a hydrodynamic activated carbon adsorption model 121
E. Schäfer, W. Loiskandl, M. Rassinger, A. Weingartner, W. Urban

Computational Fluid Dynamics (CFD) applied to design and optimization of drinking water treatment facilities 129
Z. Do-Quang, O. Taudou

SECTION 3: HYDRAULIC NETWORKS AND IRRIGATION

Recent applications of genetic algorithms to water system design 143
G.A. Walters, D.A. Savic

Leak detection and monitoring in hydraulic networks 153
E. Koelle, E. Luvizotto Jr, J.G.P. Andrade

Mathematical optimization of the main water distribution system city of Hanoi, Vietnam 163
R.G. Cembrowicz, S. Ateş, K.M. Nguyen

Criteria for the economic design of a sub-unit of a trickle irrigation system 173
V.S. Srinivasan, J.A. Guimarães, Jr

The computation of the water balance and the modelling of the irrigation schedule of a cotton crop with the model SWBACROS 183
C. Babajimopoulos, A. Panoras, I. Mavroudis, G. Bilas

SECTION 4: OPEN CHANNEL FLOW

Simulation of bend flow by a depth-averaged two-dimensional model 195
H.-C. Lien, J.-C. Yang, K.-C. Yeh

Numerical simulation of the lahars triggered by the 1877 eruption of Cotopaxi Volcano (Ecuador) 205
E. Aguilera, L. Cavarra, M. T. Pareschi, M. Rosi

Optimal short-term operation of a cascade of hydropower stations 215
A.J. Wolf, P.O. Lindberg

Open boundary condition for unsteady open-channel flow 223
K. Mizumura

Numerical analysis of unsteady open channel flows with channel processes 233
N. Nagata, T. Hosoda, Y. Muramoto, M.M. Rahman

Water level oscillations in reservoir caused by upstream hydropower plant operation 243
J. Muškatirović, R. Kapor

SECTION 5: HYDRODYNAMIC MODELLING

Simulation of wind-induced currents using a multi-level model 251
H. Tsuruya, K.P.P. Pathirana, Y. Nakagawa

A numerical flume 261
J. Versteegh

Stastical method for viscosity estimation in an incompressible laminar flow model 271
A. Rupnik, J. Krope, D. Goričanec

Three-dimensional numerical model for fish diversion studies 281
E.A. Meselhe, A.J. Odgaard, V.C. Patel

Closed-form analytical solutions for steady-state density-dependent flow and transport in a layered vertical soil column 291
N. Park

A first step in building a generalized hydrodynamic model 299
M. Elzeir, J. Berlamont

Development and application of one-dimensional water quality model for channel networks and tidal rivers 309
P. Sudjono, K. Koga, H. Araki, N. Booij

SECTION 6: COASTAL DYNAMICS AND ESTUARIES

The K-L turbulence model vs parametric formulations 323
J. Antunes do Carmo, P. Silva, F. Seabra-Santos

Numerical modelling of salinity intrusion into an estuarine river 335
K. Inoue, K. Toda, M. Tanaka

A new method to predict directions of sediments movement in the sea 345
K. Mizumura

A two-dimensional model of undertow current over mud bed 355
Mir Hammadul Azam, N.Hj. Mokhtar, Md. Akhtaruzzaman Sarkar

Application of a tidal prism water quality model to the Lynnhaven Bay, USA 363
K. Park, A.Y. Kuo

Hydrodynamic analysis of pneumatic wave power generators 373
D. J. Wang, M. Katory

SECTION 7: WAVE PROPAGATION

Numerical analysis of breaking waves 385
Y. Watanabe, H. Saeki

A full numerical simulation of wave dynamics at coastal structures with the volume of fluid method 395
Z.A. Sabeur, R.G. Beale, V. Bovolin

Refraction-diffraction wave models in the inshore zone 405
K. Angelidis, Th.V. Karambas, C. Koutitas

Representation of partial wave reflection and transmission for rubble mound coastal structures 415
Th.V. Karambas, E.C. Bowers

SECTION 8: NUMERICAL MODELLING

Analysis of pervious high pressure tunnels using boundary elements 427
Z. Lu, L.C. Wrobel

A boundary integral technique for free surface flows under gravity 437
X. Wen, K. Manik, D.B. Ingham

Discrete-vortex simulation of shallow recirculating flow behind a backward-facing step 447
R.W. Barber

Numerical modelling of double-diffusion with an algebraic tress/flux model 457
A.S. Al-Ghamdi, R.N. Meroney

Verification of a three-dimensional numerical model with a physical model (one-phase flow and cavitation) 469
H. Knoblauch, T. Dum, R. Klasinc

Optimal nozzle design using finite element conjugate gradient based software 479
Z. Mrsa, G. Medic

SECTION 9: GIS AND ADVANCED SOFTWARE

Application of fuzzy inferencing principles in reservoir operation analysis 491
I. Goulter, Suharyanto

Building an effective decision support system for the maintenance of underground/sewage networks 505
M. Burde

A software for optimal reservoirs management in Sardinia (Italy) - GhOST 515
S. Angioni, M.C. Melis, A. Podda

RAINBOW: a software package for analysing hydrologic data 525
D. Raes, D. Mallants, Z. Song

Index of Authors 535
