ANNE COUDRAIN-RIBSTEIN
URA CNRS, Circulation et transferts hydriques Continentaux, Laboratoire Géologie Appliquée, Université Pierre et Marie Curie, 4 Place Jussieu, F-75252 Paris Cedex 5, France

Proceedings of an international symposium (Symposium S5) held during the Fifth Scientific Assembly of the International Association of Hydrological Sciences (IAHS) at Rabat, Morocco, from 23 April to 3 May 1997. This symposium was convened by the International Commission on Water Quality (ICWQ) and the International Committee on Tracers (ICT) of IAHS. The symposium was sponsored by the United Nations Educational, Scientific and Cultural Organization (UNESCO), the World Meteorological Organization and the Moroccan Water Resources Association, and is a contribution to UNESCO's International Hydrological Programme V, Projects 5.1 and 6.1

IAHS Publication no. 244
in the IAHS Series of Proceedings and Reports

Contents

Preface (in English) by Norman E. Peters and Anne Coudrain-Ribstein v
Préface (in French) by Norman E. Peters and Anne Coudrain-Ribstein vii

1 SALINIZATION AND SALTWATER INTRUSION

Role and contribution of environmental tracers for study of sources and processes of groundwater salinization (Keynote paper)
Yuecel Yurtsever 3

Hydrochemical evaluation of the Umm-er-Radhuma aquifer system, Saudi Arabia
A.M. Al Bassam, M.T.Hussein & M.A. Sharaf 13

Field and laboratory experiments for assessing parameter reliability and verifying salinization models
Anna P. Belousova 27

Contribution des isotopes à l'étude de la recharge des aquifères de la région de Beni Mellal (Tadla, Maroc)
Lhoussaine Bouchaou & Jean-Luc Michelot 37

Un modèle de simulation des interactions entre sels et saumures
Rachida Bouhlila 45

Bilan et évaporation d'un aquifère en zone aride, Altiplano central bolivien
Anne Coudrain-Ribstein, Bruno Pratx, Claude Jusserand, Jorge Quintanilla & David Cahuaya 53

Estimation de l'évaporation des eaux souterraines du Chott Chergui (Algérie) par l'étude de profils isotopiques de la zone non saturée
Dahmane Daoud & Jean-Luc Michelot 63

Dynamique et salinité de la nappe côtière d'Agadir (Maroc), influence du biseau salé et des faciès évaporitiques
Y. Hsissou, J. Mudry, J. Mania, L. Bouchaou & P. Chauve 73

Modelling saltwater intrusion by the finite element method
A. Larabi, F. De Smedt & M. Tanarhte 83

Modelling of streamflow, stream chloride and groundwater in five experimental catchments in Western Australia
Marek Mroczkowski & George Kuczera 95

Hydrochimie et isotopes de l'environnement appliqués à l'étude des eaux souterraines du Sud de la Côte d'Ivoire
Nagnin Soro & Albert Goula Bi Tie 105

Mise en évidence de l'intrusion marine de la nappe d'El Jadida, Maroc
Abdelkader Younsi, Elkbir Lhadi, & Jacky Mania 115

2 TRACER TECHNIQUES

The analysis of low concentration mineral traces: a new tool
to determine the origin of water and its pollution (Keynote paper)
Aurèle Parriaux 125

Confrontation des méthodes de la géochimie, de l'hydrodynamique
et de l'hydrologie statistique pour l'étude des crues
Jean-Michel Grésillon, Vincent Marc, Anita Schober & Ammar Taha 133

Evolution des différentes formes du carbone organique dans la Marne,
influence du "bloom" phytoplanctonique
Aicha Jairy & Andre Chesterikoff 141

Analyses isotopiques et chimiques des précipitations sahéliennes
de la région de Niamey au Niger: implications climatologiques
Jean-Denis Taupin, Robert Gallaire & Yves Arnaud 151

3 HYDROLOGICAL AND HYDROCHEMICAL PROCESSES

Combining hydrometric-hydrochemistry methods:
a challenge for advancing runoff generation process research (Keynote paper)
M. Bonell & J.M. Fritsch 165

Potentials and limitations in using geochemical tracers
Jason Ball & Stephen Trudgill 185

Modeling water, nutrient and sediment fluxes
using catchment-scale parameters
C.J. Barnes, D.L. Short & M. Bonell 195

Deuterium and oxygen-18 isotopes on ground water salinization
of adjoining salt pans in Porbandar coast, Gujarat, India
H. Chandrasekharan, Navindu Gupta & S.V. Navada 207

Interpretation and modelling of multi-tracer tests
in heterogeneous geological media
Alain Dassargues 217

Stormflow generation in tropical rainforests:
a hydrochemical approach
Dagmar Hensel & Helmut Elsenbeer 227

Hydrochimie et recharge de la nappe phréatique du Continental Terminal (Niamey, Niger)
Christian Leduc & Jean-Denis Taupin 235

Origines des sels dans l'aquifère de la Chaouia côtière (Maroc)
Ahmed Marjoua, Philippe Olive & Claude Jusserand 245

Global comparison of the pH determining factors of the streamwaters in world forest basins
Nobuhito Ohte & Yuko Asano 253

Hydrologic pathways and runoff sources in an upland basin in Hong Kong
Mervyn R. Peart & L.K. Kung 267

Tracing hydrologic pathways at the Panola Mountain Research Watershed, Georgia, USA
Norman E.Peters & Elizabeth B. Ratcliffe 275

Hydrogéochimie du bassin forestier équatorial Dja-Ngoko, Cameroun
Luc Sigha-Nkamdjou, Paul Carré, Jean-Claude Olivry & Patrick Seyler 291

Hydrology and hydrochemistry of a montane rainforest catchment in Queensland, Australia
C. Soulsby, A. Pomeroy & C. Gibbins 299

Long-term solute runoff analysis of a Japanese forested mountain basin using a mathematical model
Takao Tamura, Hiromu Yoshida & Michio Hashino 309

Tracing bedrock weathering and hydrologic flowpaths beneath an Alpine glacier using $\delta^{34}S$ and $^{87}Sr/^{86}Sr$
Martyn Tranter, Helen Lamb, Simon Bottrell, Rob Raiswell, Martin Sharp & Giles Brown 317

Hydrochimie des eaux de surface en zone de montagne sur socle cristallin, Massif du rila (Bulgarie)
Sophie Violette, Nathalie Gassama & Luis Espinosa 325

Stable isotopic composition of groundwater from Mt. Yatsugatake and Mt. Fuji, Japan
Masaya Yasuhara, Atsunao Marui & Kohei Kazahaya 335

British Library Cataloguing-in-Publication Data
A catalogue record for this book is available from the British Library.

IAHS is indebted to the employers of the editors for their invaluable support and services provided that enabled the editors to work effectively and efficiently. The use of email and access to the Internet proved invaluable for communication among editors and authors. Support from the U.S. Geological Survey for the first editor is particularly appreciated and acknowledged.

The designations employed and the presentation of material throughout the publication do not imply the expression of any opinion whatsoever on the part of IAHS concerning the legal status of any country, territory, city or area or of its authorities, or concerning the limitation of its frontiers or boundaries.

The use of trade, firm or corporate names in the publication is for the information and convenience of the reader. Such use does not constitute an official endorsement or approval by IAHS of any product or service to the exclusion of others that may be suitable.

The editors are grateful to the authors who prepared the papers on time and in the proper format. In particular, those authors who provided computer files of the manuscript and figures made the editing and final formatting much easier than it would have been otherwise.

The camera-ready copy for this publication was produced by the lead editor on a Macintosh Power PC 8100/100 computer with FrameMaker 5.1.1 software and printed on a Data General, Model 6948, 1200 dpi laser printer at the U.S. Geological Survey, 3039 Amwiler Rd., Suite 130, Atlanta, GA 30360-2824, USA. All figures were either transferred into the documents electronically from files provided by the authors, or scanned into the computer using an AGFA ARCUS II scanner and touched up using Adobe Photoshop 3.05 and Adobe Illustrator 5.0.
