Walter Geller · Helmut Klapper · Wim Salomons (Eds.)

Acidic Mining Lakes

Acid Mine Drainage, Limnology and Reclamation

With 155 Figures and 55 Tables

Direction de la Documentation et des Données - OFFICE INTERNATIONAL DE L'EAU -

Springer

Contents

Part 1
Introduction

1 Natural and Anthropogenic Sulfuric Acidification of Lakes
W. Geller, H. Klapper and M. Schultze 3

2 Regional Geology of the Lignite Mining Districts in Eastern Germany
P. Schreck and W. Glässer 15

Part 2
Limnological Case Studies on Acid Lakes

3 Chemical Characteristics of Water and Sediment in Acid Mining Lakes of the Lusatian Lignite District
K. Friese, M. Hupfer and M. Schultze 25

4 In-Lake Neutralization of Acid Mine Lakes
A. Peine and S. Peiffer 47

5 Acid Generation and Metal Immobilization in the Vicinity of a Naturally Acidic Lake in Central Yukon Territory, Canada
Y.T.J. Kwong and J.R. Lawrence 65

6 Geochemical Behaviour of Submerged Pyrite-Rich Tailings in Canadian Lakes
T.F. Pedersen, J.J. McNee, D.H. Flather, B. Mueller and C.A. Pelletier 87

7 Phytoplankton Composition and Biomass Spectra Created by Flow Cytometry and Zooplankton Composition in Mining Lakes of Different States of Acidification
C.E.W. Steinberg, H. Schäfer, J. Tittel, and W. Beisker 127

8 Ecological Potentials for Planktonic Development and Food Web Interactions in Extremely Acidic Mining Lakes in Lusatia
B. Nixdorf, K. Wollmann and R. Deneke 147

9 Colonization and Development of Vegetational in Mining Lakes of the Lusatian Lignite Area in Dependence on Water Genesis
W. Pietsch 169

Part 3
Inorganic Processes of Acidification

10 Pyrite Chemistry: The Key for Abatement of Acid Mine Drainage
V.P. (Bill) Evangelou 197

11 Chemical Reactions in Aquifers Influenced by Sulfide Oxidation and in Sulfide Oxidation Zones
F. Wisotzky 223

12 Oxygen as a Limiting Factor for Pyrite Weathering in the Overburden of Open Pit Lignite Areas
A. Prein and R. Mull 237

13 Effects of Superficial Tertiary Dump Substrates and Recultivation Variants on Acid Output, Salt Leaching and Development of Seepage Water Quality
J. Katzur and F. Liebner 251

Part 4
Remediation Concepts and Case Studies

14 Microbial Processes for Potential in Situ Remediation of Acidic Lakes
K. Wendt-Potthoff and T.R. Neu 269

15 Biological Abatement of Acid Mine Drainage: The Role of Acidophilic Protozoa and Other Indigenous Microflora
D.B. Johnson 285

16 Treatment of Mine Drainage by Anoxic Limestone Drains and Constructed Wetlands
R.L.P. Kleinmann, R.S. Hedin and R.W. Nairn 303

17 Biological Polishing of Zinc in a Mine Waste Management Area
M. Kalin 321

18 Development of a Long-Term Strategy for the Treatment of Acid Mine Drainage at Wheal Jane
H.M. Lamb, M. Dodds-Smith and J. Gusek. 335

19 Bioremediation of Metals in Acid Tailings by Mixed Microbial Mats
P. Phillips and J. Bender 347

20 Managing the pH of an Acid Lake by Adding Phosphate Fertiliser
D.G. George and W. Davison 365

21 Model Calculations for Active Treatment of Acidic, Iron-Containing Lake Water Assuming Mining Lakes as Chemical Reactors
R. Fischer, T. Guderitz and H. Reißig 385

22 Ways of Controlling Acid by Ecotechnology
H. Klapper, K. Friese, B. Scharf, M. Schimmele and M. Schultze 401

Part 5
Summary of Group Discussions and Conclusions

23 Pyrite Oxidation Control
V.P. Evangelou, Rapporteur 419

24 Limnological Fundaments of Acid Mining Lakes
M. Kalin and W. Geller, Rapporteurs. 423

25 Approaches for the Restoration of Strongly Acidic Mining Lakes
R.L.P. Kleinmann, Rapporteur 427

Subject Index 431
