**International Technical Conference on  
MEMBRANE SEPARATION PROCESSES  
Brighton, UK: 24-26 May, 1989**

**CONTENTS**

	Page
<b>GAS AND VAPOUR</b>	
Application of membrane pervaporation to the dehydration of alcohols in chemicals and pharmaceuticals processing D A Coleman and T D Naylor, BP International; G K Pearce and R D Whitby, Kalsep, UK	1
Modelling of the fractionation of binary liquid mixtures by continuous pervaporation with regard to the hydrodynamic behaviour of the module used B Wandelt, Q T Nguyen, R Clement and J Neel, ENSIC-LCPM, France	19
Mass transfer characteristics of oxygen and carbon dioxide in an artificial gill H Matsumoto, A Kakimoto, S Sato, Mitsubishi Heavy Industries Ltd, Japan	31
<b>GAS AND VAPOUR</b>	
The use of membrane gas separation systems for the post harvest storage and transportation of fruit and vegetables G R Rigby and B A Jones, BHP Central Research Laboratories; C R Little and P Dalgleish, Department of Agriculture and Rural Affairs, Australia	43
Carbon dioxide transfer across microporous polypropylene membranes J M Pei, J D S Gaylor and G Bell, University of Strathclyde, UK	55
<b>PLANT AND APPLICATIONS</b>	
From pilot to production – challenges of system design and scaleup P S Cartwright, C <sub>3</sub> International Inc, USA	65
Recent Developments in membranes for critical filtration applications A C J Orchard, Pall Process Filtration Ltd, UK	79
Membrane filtration and down stream processing – an indispensable combination J Wagner, DDS Filtration, Denmark	93
<b>CERAMIC MEMBRANES</b>	
Ultrafiltration with porous glass membranes P Langer, R Schnabel and S Breitenbach, Schott Glaswerke, FR Germany	105
Prediction of the structure and blinding of an inorganic cellular membrane in dead end ultrafiltration K L Chan, J H F Lim and G A Davies, UMIST, UK	121
Fouling behaviour of inorganic tubular membranes M Asaadi, D A White, Imperial College, UK	143
Membrane fouling control in cross flow filtration of wine with mineral membranes M Y Jaffrin and R B Amar, Technological University of Compiègne, France	157

## **MEMBRANE PROCESSES IN WATER AND WASTE TREATMENT**

- Cyanide wastes: treatment and recovery 167  
M J Semmens and Y Chang, University of Minnesota, USA
- Transport properties of ion-exchange membranes for the desalination of brackish waters 179  
G Wisniewska and T Winnicki, Technical University of Wroclaw; S Koter and A Narebska, Copernicus University of Torun, Poland
- Photosynthetic membranes for pure and ultrapure water production 187  
I R Bellobono, R Tacchi, and E Selli, University of Milano; F Muffato, SORA SpA, Italy
- New reverse osmosis (RO) membrane materials with high chlorine resistance 195  
S Konagaya, H Kuzumoto, K Nita, M Tokai and O Watanabe; Toyobo Research Centre, Shiga, Japan
- Ground water desalination for the prevention of corrosion in wet chute ore sorters 207  
P J Metcalf and M S Hunt, De Beers Industrial Diamond Division, Republic of South Africa

## **MISCELLANEOUS**

- Use of power fluidics in ultrafiltration 223  
K N Gosling, D Green, H A Kearsy and A P Wilson, UKAEA, UK
- Recovery of spent mineral acids via electrolytic water splitting 235  
K N Mani and F P Chlanda; Allied Corp/AQUATECH Systems, USA

## **FOOD AND BIOTECHNOLOGY**

- Membrane separations in biochemical recovery: physical and biochemical considerations for general purpose application 253  
J G Huddleston, A Sansome-Smith, Wa Deng-Xi and A Lyddiatt, University of Birmingham, UK
- Recovery of recombinant human serum albumin from yeast fermentation cultures using crossflow microporous filtration 267  
D Pearson and A Quirk, Delta Biotechnology, UK
- Dynamic filtration of microbial suspensions 279  
K H Kroner and H Shuttee GBF-Ges.f. Biotechnol Forschung, FR Germany
- Demineralsation and deacidification of grape sugar musts by electro dialysis 291  
G Tusel, GFT, Le Bouar, LCL, J L Escudier and P Cottereau, INRA, France
- Application of emulsion membrane filtration to phenol recovery 303  
K Scott and J O Oloidi, Teeside Polytechnic, I F McConvey, ICI, UK

Membranes are becoming increasingly important in the separation of solids, liquids and gases in an industrial context. The advent of new materials, including ceramics, and the stringent requirements of producers and consumers has brought about dramatic improvements in purity and quality of fresh and processed foods and pharmaceuticals. New applications in biotechnology and chemicals processing have also resulted in novel techniques being developed.

This volume contains 24 papers from international experts working in a wide variety of fields, and deals with many current issues in membrane separation technology. The book will be of value to researchers, manufacturers and producers, as well as academics, in the areas of the process, pharmaceuticals, food and biotechnology, energy and minerals industries.
