Date de parution 1989,

Pages : Début 447 P. Fin

Auteur (s) KIENZLE S., MAAREN H. -,

Z

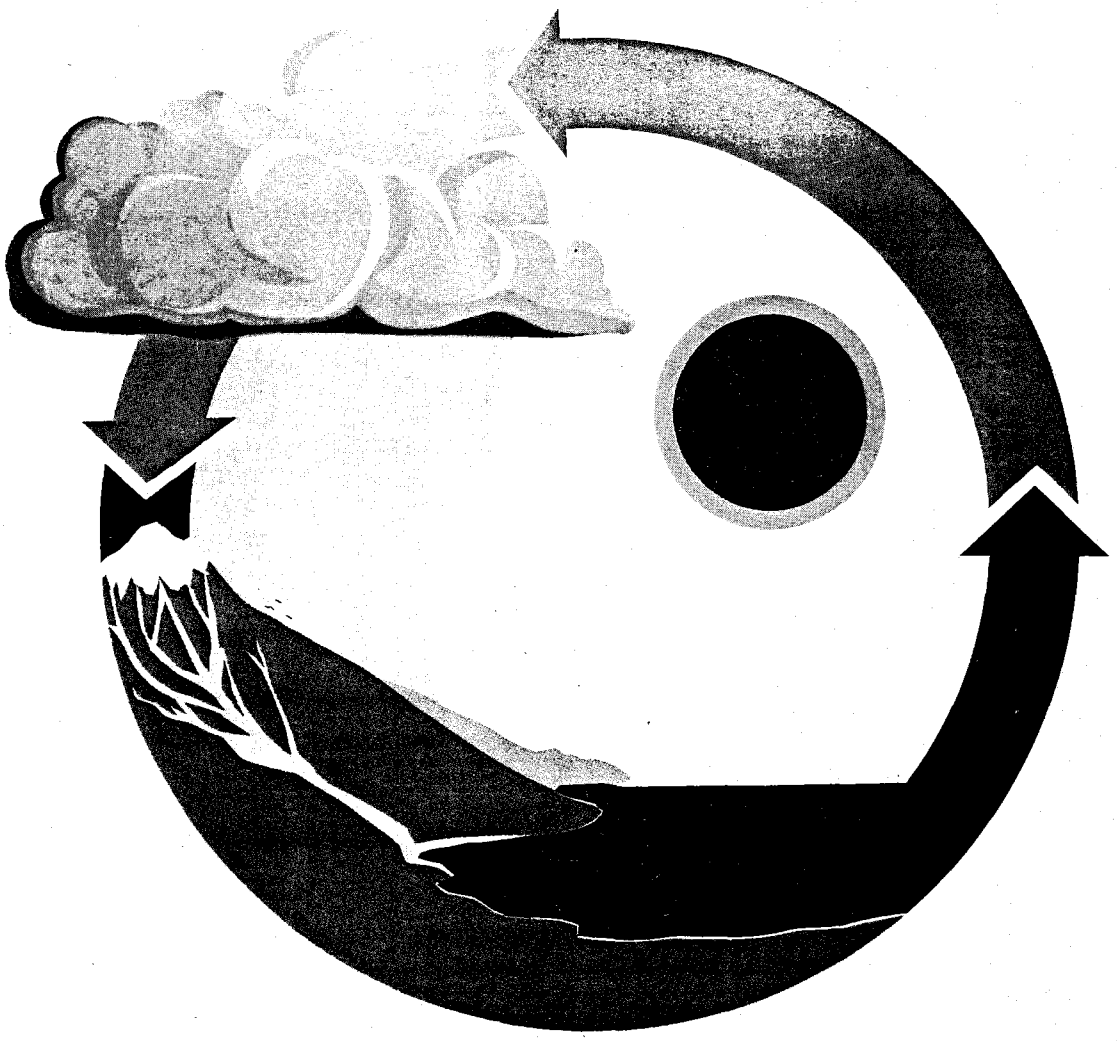

Titre original : CONFERENCE. FOURTH SOUTH AFRICAN NATIONAL HYDROLOGICAL SYMPOSIUM

L'hydrologie en Afrique du Sud. Innondations. Problèmes de limnologie. Qualité et rejet dans le milieu naturel. Transport des sédiments. Qualité de l'eau des bassins versants. Systèmes d'aide à la décision. Nombreux résultats chiffrés. G 11208.

Vierde Suid-Afrikaanse Nasionale Hidrologiese Simposium

Fourth South African National Hydrological Symposium

66/71300

SANC IAHS

PRETORIA
20 - 22 November 1989

S1300

TABLE OF CONTENTS

		Page
FORWORD:	E BRAUNE	1
KEYNOTE ADDRESS:	Recent developments in flood estimation water resources management in Australia **D H PILGRIM**	2-22
SESSION:	**WATER AVAILABILITY AND ALLOCATION**	
Overview paper:	**R A Pullen**	
Yield characteristics of reservoirs in semi-arid regions **G W ANNANDALE**		23-37
The integrated planning and management of water resources systems **M S BASSON and J A VAN ROOYEN**		38-44
The impact of minor dams on the water resources of the upper Olifants River basin **W V PITMAN and R A PULLEN**		45-54
A multi-site stochastic daily rainfall model **B KELBE**		55-62
A probabilistic study of drought durations in Lesotho **S MAKHOALIBE and T C SHARMA**		63-73
Fifteen years of small catchment research through the Water Research Commission **H MAAREN**		74-83
Evaporative losses from wetlands: First results from Ntabamhlope **R A CHAPMAN and R E SCHULZE**		84-90
Project to update surface water resources information in South Africa **D C MIDGLEY, B J MIDDLETON and W V PITMAN**		91-98

SESSIONS : **FLOODS**

Overview paper: Flood hydrology - empiricism, logic and science
W J R ALEXANDER 99-113

Radar observations of heavy rainfall
R C GROSH 114-125

Problems in measuring convective rainfall for hydrology
A W SEED 126-134

Non-stationary catchment responses and other problems in determining flood series : A case for a simulation modelling approach
R E SCHULZE 135-157

Regional indices of catchment soil water status prior to potential flood producing storms in southern Africa
E J SCHMIDT and R E SCHULZE 158-164

A simple emergency flood control procedure for gated dams
S A CRERAR 165-171

The use of an urban flood damage rating system to aid stormwater control
M BRAUNE and B J MIDDLETON 172-179

Riverflow information during floods in the Vaal and Orange River system
N J VAN WYK 180-185

Hersiening van nasionale vloedbestuursbeleid
J KROON 186-193

GENERAL LIMNOLOGICAL SESSION

Water chemistry of south-western Cape wetlands
M J SILBERBAUER and J M KING 194-201

How applicable are eutrophication models which are based on bottum-up relations to the primary production and water quality of the polluted turbid Modder river?
J U GROBBELAAR 202-207

An assessment of the effects of the January 1981 floods on the indigenous fish fauna of certain sections of the Bree and Gouritz
K C D HAMMAN

Reporting water quality information with an index
C A MOORE 208-214

Short-term changes in water quality parameters in the Vaal River. I Physical, chemical and algological variables
A J H PIETERSE and J C ROOS 215-225

Short-term changes in water quality parameters in the Vaal River. II Primary productivity and Community metabolism
J C ROOS and A J H PIETERSE 226-234

Trophic relationship between macro-invertebrates in the head-waters of the Buffalo River; Insights into the role of the flow patterns
C G PALMER

Vaal dam water quality: can it be affected by air pollution?
I TAVIV, C E HEROLD and H MULLER 235-242

Application of a hydro-dynamic reservoir model to Laing Dam to investigate the impact of proposed low-salinity imports
A H M GÖRGENS and S F FORSTER 243-250

Influence of urban run-off on estuarine water quality
D A LORD

Artificial wetland wasteland treatment: why are vertical flow systems so effective
K H ROGERS

SESSION: WATER REQUIREMENTS OF THE AQUANTIC ENVIRONMENT

Overview paper: Water for environmental management: an overview
D WALMSLEY 432-447

The impact of recent developments in the upper Vaal River on components of the river ecosystem
F M CHUTTER and B K FOWLES 251-259

The effects of impoundment on the flow and water quality of two contrasting southern African river systems
B R DAVIES, R W PALMER, J H O'KEEFFE and B A BYREN 260-268

The absorption effect of the proposed Olifantsspruit Dam on the flow regime of the Nyl River flood plain - A quantitative assessment
E A NEL, H S POTGIETER and A G CHEMALY 269-280

The distribution and composition of fish communities in the major rivers of the Kruger National Park
I A RUSSEL and K H ROGERS 281-288

Application of the revised physical habitat simulation (PHABSIM II) to minimum flow evaluations of South African rivers
J A GORE and J M KING 289-296

An estuarine circulation study
J H SLINGER

The wetlands of the southern Cape coast
B R ALLANSON 297-299

SESSION: FLOW PROCESSES AND SEDIMENT TRANSPORT

Overview paper : Flow processes and sediment transport
A ROOSEBOOM 300-313

The tracer approach in hydrological system analysis of small catchments
A HERRMANN 314-330

Post flood channel geometry and recovery in alluvial rivers
D VAN BLADEREN 334-338

Phragmites reedbeds in the Kruger National Park: The complexity of change in riverbed state
A J CARTER and K H ROGERS 339-346

Methods to determine the origin and delivery of sediment in the Mfolozi catchment
J U LOOSER 347-354

SESSION : CATCHMENT WATER QUALITY

Overview paper: Catchment water quality
H F FURNESS 355-363

The quality of South Africa's surface water resources and the effect on users
M VAN VEELEN 364-372

Recent developments in management orientated models for predicting the impact of eutrophication control measures
J N ROSSOUW and H KELLY 373-380

The role of computer models in identifying the PWV blending scheme as the most viable option for ameliorating the effects of salinisation of the Vaal River
C E HEROLD and C TRIEBEL 381-389

Salinity dynamics in the middle reaches of the Breede River valley, western Cape province, RSA
S W KIENZLE 390-399

Studies of shallow and deep groundwater dynamics for salinity research in the Breede river valley, western Cape province, RSA
W A FLÜGEL 400-408

Hydrosalinity model development for irrigation water supply planning in the Breede River
A H M GÖRGENS, A GREYLING, H BEUSTER and S F FORSTER 409-416

SESSION : DECISION AND INFORMATION SYSTEMS

Overview paper : Decisions and information systems for South African water management
A H CONLEY 417-431

The use of Geographic Information Systems in water resources management
E MARRAO

Data of hydrologic value can be determined by satellite remote sensing
A HOWMAN, U LOURENS, L RANDALL and A W SEED
